

The list of viruses

Please select from the list below for a complete list of each type of virus;

- Macro viruses, [Click Here](#) to view the list.
- Boot sector viruses, [Click Here](#) to view the list.
- MS DOS File viruses, [Click Here](#) to view the list.
- Windows NE File viruses, [Click Here](#) to view the list.
- Windows PE File viruses, [Click Here](#) to view the list.
- Polysearch viruses, [Click Here](#) to view the list.
- Memory viruses, [Click Here](#) to view the list.

To find out when a virus was added to the DAT file detection [Click Here](#)
or, select the Index tab (above), Find, Next>, Finish and enter the name of the virus.

Memory Viruses

Contact Information

The developers of InoculateIT Personal Edition have always aimed to provide software that will operate in the background until a virus attempts to infect and damage your PC.

If you have a technical support question please see [the FAQs](#) for immediate answers, or email IPE_Support@cai.com. InoculateIT Personal Edition technical support staff have a support level target to answer all e-mail with 48 hours of it being delivered.

If you suspect that you have a file that is infected with a virus that IS NOT detected by InoculateIT Personal Edition please email a copy of the file to IPE_Virus@cai.com. The InoculateIT Personal Edition virus dissection team will send an updated DAT file back to you within 48 hours. This will allow you to detect and clean the virus. (Standard response time is within 24 hour hours).

Computer Associates International has offices in the following countries:

Argentina, Australia, Austria, Bahrain, Belgium, Brazil, Canada, Chile, China, Colombia, Czech Republic, Denmark, Finland, France, Germany, Hong Kong, Hungary, India, Indonesia, Ireland, Israel, Italy, Japan, Korea, Malaysia, Mexico, The Netherlands, New Zealand, Norway, Philippines, Poland, Portugal, Russia, Singapore, South Africa, Spain, Sweden, Switzerland, Taiwan, Thailand, Turkey, United Kingdom, United States and Venezuela.

Select an office for additional details. If you are not sure which office serves you, call 1-516-DIAL CAI (342-5224) for information.

Year 2000 Support

We are pleased to advise you that InoculateIT PE currently supports Year 2000 processing.

Computer Associates' basic support for the millennium date change (Year 2000) provides or will provide for proper operation of our products according to the published documentation. In most cases, this means simply assuring that dates are evaluated and processed properly for sequence and comparison. Testing and Quality Assurance processes are carried out to validate the operation of these products as related to the millennium date change, and any functional errors will be accepted as issues (bugs) and resolved according to our standard maintenance and support policies.

As long as your license for each respective CA program remains in effect and active on maintenance, you will be entitled to all of the benefits of CA's implementation of Year 2000 date support as described above. Of course, nothing herein should be deemed to modify in any way any of the terms or conditions of any existing license between us respecting any CA program.

Eicar - A file to test your configuration

This is a program from the **European Institute for Computer Anti-Virus Research** that can help test the virus detection capabilities of Anti-Virus software.

This is a small .COM file for DOS that simply prints the message

EICAR-STANDARD-ANTIVIRUS-TEST-FILE!

when executed. It has the useful property that it consists entirely of printable ASCII characters, so you can easily email or fax it to someone.

Many anti-virus products will detect this file as if it had a virus. Most will give a special message to make it clear that this is a test file and not a real virus. For example, when the EICAR file is scanned, the following message will be displayed:

Detected the EICAR test string. Not a virus.

The main use of the EICAR test file is to test that your Anti-Virus software is configured and operating as you want it to. For example, it could be used to test that Real-Time protection is active and behaving as you expect.

While this file obviously has absolutely no virus code in it, you should only distribute it to people who have a clear understanding of what it does. Also, do not store it on production machines that run anti-virus software (except as part of a deliberate test), as it will probably trigger whatever alarm bells are in place.

Please refer to the EICAR Standard Anti-Virus Test File web page (www.eicar.org/anti_virus_test_file.htm) for more information.

Here is the EICAR test string, in its entirety:

X5O!P%@AP[4\PZX54(P^)7CC)7}\$EICAR-STANDARD-ANTIVIRUS-TEST-FILE!\$H+H*

Welcome to InoculateIT Personal Edition

Congratulations on choosing InoculateIT Personal Edition (InoculateIT PE) to protect your computer against viruses, trojans and other malicious software.

InoculateIT is a world class range of anti-virus software which can be deployed to suit any business or organisation. InoculateIT PE is a cutting edge, high performance virus package specifically designed to protect small businesses and home users from everyday virus threats.

InoculateIT PE is designed to protect individual computers without having to be installed from a network server. If you wish to install anti-virus protection to many computers in a business environment we recommend you evaluate other anti-virus products in the InoculateIT range.

This high quality anti virus tool comes with FREE software updates to registered users. It also comes with a promise that if you find a virus that InoculateIT PE is unable to detect or clean we will send you an emergency signature update in approximately 48 hours of receiving a copy of the suspected infected file.

Registered users will also receive FREE Internet E-mail support. The answers to many support questions can be found in the online help. If you open InoculateIT PE then select Help | Help Topics then select "How to get technical support and FAQs" you will find the answers to around 80% of the questions that are asked of our support team.

By registering, you are automatically subscribed to our FREE Virus Threat Notification System as well as our Update Notification Service. Anytime a new virus is found that is actually spreading around the world, this service will send an E-mail to you when a new virus signature update is available. This handy service will ensure that you are kept up to date so that you are protected against the very latest viruses. The Update Notification Service will only alert you when a new virus signature is posted on the Internet.
