

## Tutorial

Let's a tour to learn how to use the program. This will take less 10 minutes to complete.

### 1 - Create a project

A project can be composed by a simple or double sheet . It will be placed into the open side of the jewel case. It can be composed with an inside sheet. It will be placed under the part which contains the CDROM . You can print on the CDROM if you have a special printer.

## Create a project

1 - Click on **Files** then select **New project**

A form is displayed to select components which will compose your project. A little information is displayed when the mouse pass over check boxes.

For the tour you will check **Cover double** and **Inside**.

Click **OK** to continue

## Working on Double

Two child windows are loaded. (Double and Inside)

Double click on Double to open it. By default it's the outside form which is displayed first.

Now you can

- Add a Background picture

- Add a picture

- Add a text

- Go to the inside part of the double sheet

the outside of Double sheet allows you to have a background, pictures and text.  
click on the element you want to add

## Inside part of the double sheet

After clicking  the inside part of the double sheet is displayed.  
The inside part accepts text only. You can put informations about your CDROM. By using text capabilities you can have a well presentation of the inside part.  
First we are using Copy and Paste process to show how it works.

Click on  to come back on outside part.  
Click on text  to select as current selected object  
Click on  to copy object properties in the internal clipboard  
Click on  to come back on inside part  
Click on  to put the selected object in the inside part.

Now Click on  the text and select **Edit** on the floating menu .  
Click on **fonts** button  then select change size to 48  
Click on **Background Colors check Box** then select **red** color  
Click **OK** to accept your choice. The text is displayed but is larger than printable area.  
Click on the text. A floating menu is displayed. Choose **Move**.  
Now move the text where you want to put it by clicking on the arrows panel in the toolbox  
Click again on the text then select **Resize**  
Click Arrows panel until the text is fully readable.  
Repeat operation  as necessary.  
You can change font and text properties by clicking on text and selecting Edit. The text form will be displayed with the text properties selected. Text can be added from external text file. To load a text file use File Open menu in the text form.

 - Outside part of the double sheet.

## Add a Background picture

By clicking on  the picture selector windows is displayed.

Select a BMP file located in the windows 95 directory. A preview is displayed in the picture selector windows.

Click **Select**. The picture is displayed all over the printable area.

You can have a background color without picture by clicking colors button in the picture selector windows.

Click on Back button to continue

## Add a picture

By clicking on  the picture selector windows is displayed.

Select a BMP file located in the windows 95 directory. A preview is displayed in the picture selector windows.

Click **Select**. The picture is displayed all over the printable area.

Now you may adjust size and location of the picture by clicking on it and selecting **Move** or **Resize** in the floating menu. Use arrows panel in the toolbox to perform action.

Click on Back button to continue

## Add a text

Click on **T**. The text form is displayed.

Enter in the text box and type THIS IS A CDLBLSH TEST

Click on **fonts** button then select **Arial Bold 24 Blue** color

Click **OK** to accept your choice.

Click on the text. A floating menu is displayed. Choose **Move**.

Now move the text by clicking on the arrows panel in the toolbox until the upper left corner of the text box is located where you want to put it

Click again on the text then select **Resize**. Perform same arrows action until the text is fully visible.

Repeat operation as necessary.

You can change font and text properties by clicking on text and selecting Edit. The text form will be displayed with the text properties selected. Text can be added from external text file. To load a text file use File Open menu in the text form.

## Working on Inside

Minimize Double sheet with minimize button on the upper right corner of the current windows.  
Maximize Inside sheet by double clicking on it's icon.

Now you can

- Add a Background picture

- Add a picture

- Add a text

- Add a folder text (spline)

## Add a folder text (spline)

Click on the  button of the toolbox. A text form is displayed with a fonts list.

Enter your text in the text box.

Choose the font you want by clicking a font name in the fonts list. The text box will be refresh after each selection.

Click OK to print thie text on spline.

To modify spline text just click on  again.

Click on Back button to continue

## **Quick tour is finished**

This quick tour has been designed to show the basic actions. Many effects can be created by combining basic actions. (Shadow effects, combining fonts, colors text and background...)

Remember best results depend from your cliparts collection and installed fonts onto your computer. Don't forget to customize preferences to be more efficient.
