Quick Heal - Virus Checking Macros

This document contains the macros for detecting, removing and protecting your system by concept virus. It contains few macros which are copied to your global template. Thus is it not necessary to open this file every time you load Word for Windows.

Removing Quick Heal Macro Virus Protection

To remove the Quick Heal Word Virus Protection Macros, open qhfwrem.doc. This document consists of the macro which uninstalls the protection macros.

Common Questions

Q: Can this QHFW.DOC be used on MSWORD for Windows 95?
A: QHFW.DOC can be used on MSWord for Windows 95. These virus checking macros can be installed on Word 6.0 for Windows 3.1, Word 6.0.1 for the Macintosh, Word 6.0 for Windows NT, Word for Windows 95 and Windows NT.

Q. What macros are installed when we open QHFW.DOC?
A: When you open QHFW.DOC its AutoOpen macro installs the following macros in the global template.

AutoClose	: Checks for viruses while closing the document.
FileOpen	: Checks for viruses while opening the document.
QhScan	: On demand scanner.
QhChk	: Macro for internal use by other macros.

Q: Other word macro antivirus product informs a new virus in QHFW.DOC
A: Few macro virus protection tools like SCANPROT from Microsoft alert the user whenever a document containing auto macros is opened. As QHFW.DOC consists of AutoOpen macro which does the installation, such anti-virus tools may give false alarms. Please do not use more than one macro virus protection tool.
