

DIE AKTUELLEN PREISE VON ÜBER 2000 PRODUKTEN

Der Preisberater

Stehen Sie gerade vor einer Kaufentscheidung? Dann sollten Sie sich auf jeden Fall diesen Preis-Service von CHIP genauer anschauen. Hier erfahren Sie als Anhaltspunkt die Durchschnittspreise von über 2000 PC-Produkten. Einen Pentium-133-PC zum Beispiel finden Sie unter **Computer** **PC Pentium-Klasse**. Bei den PC sind keine Markennamen angegeben, sondern typische Konfigurationen

(z.B. bedeutet P5/166-16-1200-15“: Pentium PC, 166 MHz mit 16 MB RAM, 1,2-Gigabyte-Festplatte und 15-Zoll-Monitor). Bei fast allen anderen Kategorien sind die Produkte mit ihren Modellbezeichnungen genannt (d.h. einen HP Laserjet finden Sie unter **Drucker** **Laserdrucker**). Hinter den Produktbezeichnungen sind Preise genannt. Dies sind Durchschnittspreise aus aktuellen Angeboten, die CHIP zusammen mit dem

Einkaufsmagazin PC-Shopping erhoben hat (die gleiche Preisliste mit einigen Zusatzinformationen finden Sie auch in der aktuellen PC-Shopping-Ausgabe 12/96). Denken Sie bei Preisvergleichen daran, daß wir hier Durchschnittspreise nennen. Beachten Sie auf jeden Fall die Konditionen der verschiedenen Anbieter. Sie sollten Zahlungsbedingungen, Lieferanten und Transportkosten in Ihre Entscheidung einbeziehen.*
