Information for Customizing Templates

You can use these professionally designed templates as-is, or customize the size, color scheme and images to fit your own needs. Template files include custom-sized artboards, layers, styles, swatches, symbols, text placeholders and more. In addition to helping you jump-start a project, you can also use them to learn new production techniques.

Templates are located inside the Illustrator CS Applications folder and are divided into folders specific to the theme of the design. In this index, the folder theme name is shown on each page, inside the red bar.

To open a template from inside Illustrator, choose File > New from Template, navigate to the Adobe Illustrator CS folder and choose a template from the Templates folder.

To access this index from inside an Illustrator document, choose Help > Welcome Screen and click the Cool Extras icon.
