Help with CPU Load

CPU Load window

The CPU Load window is divided in two panels. The left panel, called "Usage" displays the current CPU usage percentage. The right panel, called "History" displays the history of CPU usage. The larger the CPU Load window is, the longer the History graph remembers.

This window may be resized, minimized or maximized using the usual Windows techniques.

A new button is visible in the window's title bar. When this button is clicked, CPU Load's window will be minimized to the system tray (near the clock) instead the taskbar.

A right-click on the CPU Load window will bring up the context menu. This menu is the same as the system tray icon menu. Please refer to system tray icon below for a description of the features.

System tray icon

CPU Load will create a system tray icon in the tray notification area (near the clock in the taskbar). A right-click on this icon will bring up CPU Load's menu.

The menu's features are:

- Always on top : will make the CPU Load window be on top of all other windows.
- Start CPU Load when you log on : will automatically run CPU Load whenever you log-on your computer.
- Show CPU Load window : will show and restore the CPU Load window.
- Hide CPU Load window : will hide the CPU Load window and minimize it to the system tray.
- About CPU Load : will show the about box of the software.
- Help : will bring up the help file.
- Exit : will close CPU Load and hide the tray icon.
