

Installation VLP 120 DEMO Version

1) Installation of the sound library

- The file „vlp120-demo.ulp“ contains the sounddata for the demo.
- Copy this file onto the hard drive in a subdirectory of your choice.

2) Installation of the plugin

- Copy the file „VLP120 Demo.dll“ into the VSTPlugins folder of your host application or sequencer.

3) First start

- The path of the folder containing the ULP file will be asked once during the first start so that it can be found.
