## Version history

Version 1.23 (13. October 2003):

New:

- New Logo.
- About box will open when the Logo is clicked.

Fixes:

- Dual Monitor problem fixed.

Version 1.22 (8. September 2003)

Fixes:

- Noise burst problem introduced in the last update fixed.

Version 1.21 (7. September 2003):

New:

- Minor adjustments have been done on the colour scheme.

Fixes:

- The last fix reduced the smoothness of the sound in the high frequency range - it is now back to normal.

Version 1.20 (28. July 2003):

New:

- Unique colour makes it easy to distinguish from the other plugins in the Classic Series.
- Real parameter values are now being showed while adjusting the knobs.

Fixes:

- Problem with very loud burst noises in some systems is now fixed.

Version 1.11 (22. July 2003):

Fixes:

- “Looping” problem under some Hosts now fixed. The problem was introduced in version 1.10.

Version 1.10 (20. July 2003):

New:

- You can now grab the knobs by clicking anywhere on them. The knobs will no longer jump from max to min position in a clock vice motion and vice versa.
- Automated parameters are now listed with real names and values.

Fixes:

- It now works in stereo when used as send effect.

Version 1.00 (14. July 2003):

- First release.
