

Do you have QuickTime?

Your computer doesn't appear to have Apple's QuickTime software installed on it, or you have a version which we can't identify. Please tell us what you want to do.

If you click the top button, QuickTime will be installed on your computer and you will have to re-start *Computer Music Interactive* after this is complete.

If you click the middle button, we will assume you have QuickTime installed and *Computer Music Interactive* will continue.

If you click the bottom button, *Computer Music Interactive* will quit and return you to your computer's operating system.

Warning If you do not have QuickTime on your computer, some features of the interface will not work correctly.
