

Do you have QuickTime?

Your computer doesn't appear to have Apple's QuickTime software installed on it, or you have a version which we can't identify. Please tell us what you want to do.

If you click the top button, we will assume you have QuickTime installed and *Computer Music Interactive* will continue.

If you click the middle button, QuickTime will be installed on your computer and you will have to re-start *Computer Music Interactive* after this is complete.

If you click the bottom button, *Computer Music Interactive* will quit and return you to your computer's operating system.

Warning If you do not have QuickTime on your computer, some features of the interface will not work correctly.
