

Ulead Color Picker dialog box

Allows you to choose colors visually from a color palette.

- **First color tab** Shows the full color spectrum. Click a color close to the one you want, then drag the cursor on the resulting brightness and contrast bar to the perfect shade.

- **Other color tabs** Show 88 color blocks, each containing related colors. Click the color block you want and then fine tune it manually changing the RGB values.

- **Red / Green / Blue values** Enter a new value for the red, green, and blue channels here if you know the RGB value of the color you want.

- **New / Current color squares** The left side shows the new color you have selected. The right side shows the color before you apply a new one.

- **16 color squares** Displays the colors available in a 16-color palette. Click a square to change the New color square.

- **Color's information** Displays the corresponding value of the color under the mouse pointer in the different types of color models.
