

Here a a number of cheat codes that I know for Mech2

NOTE:Hold down Ctrl,Alt,and Shift while entering

BLORB:Invulnerability

CIA:Infinite ammo

ENOLAGAY:(Does not work all the time)A large bomb blows away everything(including you unless you are invulnerable). Test it out in the middle of a lot of buildings.

IDKFA:Reminds you Mech2 ain't Doom and will either eject you or blow you up.Great to tell friends to type in when they've almost reached the dropship.

MICHELIN:Lets you see bounding spheres

MIGHTYMOUSE:Infinite jump jet fuel

FLYGIRL:Add jump jets

TINKERBELL:I have no idea what this does

Here's a code that lets you use Elementals and Turantulas in the Trial of Grievance.

Enter the Star Configuration.Click on your name in the box above your Mech.Change your name to "Hobbes". As long as you change your name to "Hobbes" you can use the two special Mechs in the Trial of Grievance.NOTE:You can't customize the two Mechs.
