

Features and Benefits

Feature	Function	Benefit
Project Saver 	Launches all documents and applications needed for a specific project with a keystroke.	<p>Save time and stay organized, without having to file documents and then remember where you put them.</p> <p>Picking up where you left off on a project is fast and easy.</p>
Tour Guide 	Create guided "tours" of Web sites, complete with notes, that can be shared with friends or colleagues. The person on the "tour" does not have to have QuicKeys, just a Mac Web browser.	<p>Put all the information the Web has to offer at your fingertips, or those of a friend or colleague.</p> <p>Organize, group and share Web information in a way that makes sense to you.</p> <p>Interoperability. Works with any Macintosh browser.</p>
Web Launcher 	Launch any Web site, from any application, with a shortcut.	<p>Quick and easy access to all the information the Web has to offer.</p>
Advanced Text Tools 	Automatically reformats and "cleans up" text copied from a Web browser or E-mail. Also automatically strips quote marks from the beginning and end of each line of a selection of text, changes text case, and uses simple encryption to scramble highlighted text.	<p>Make full use of text from the Web, E-mail messages or newsgroups quickly and easily. Your work looks great, every time.</p> <p>Keep your work safe from prying eyes, especially where computers are shared.</p>
File Handlers 	Automatically moves highlighted files or folders to the trash or to a designated folder. Also automatically locks, unlocks or renames designated files.	<p>Save time with those file actions you perform dozens of times each day. Keep files organized, stored and named the way you want them. Save time preparing files to be batch-processed.</p>

Feature	Function	Benefit
Instant E-mail 	<p>Compose an E-mail message and attach a file or group of files in one easy step. PowerPak can also trigger checking and sending E-mail.</p>	<p>Quick and easy E-mail functionality from any application helps you communicate more efficiently and saves time.</p> <p>Automate checking and sending E-mail with a click.</p> <p>Flexible. Ready for use with all the most popular E-mail applications, including QuickMail Pro.</p>
Network Switcher 	<p>Simplifies the process of switching between IP configurations for a full-time and a dial-up Internet connection. Ideal for PowerBook users.</p>	<p>Ensures a quick and accurate transition between home, work and on-the-road Internet use.</p> <p>Simplifies using the Internet. No confusing IP addresses to remember.</p> <p>Helps make a fast and easy connection to the Internet, wherever you are.</p>
Password Vault 	<p>Stores passwords that are part of QuickKeys shortcuts in encrypted text.</p>	<p>Save time launching password-protected files or applications without risking the integrity of your passwords.</p> <p>Perfect for people who share a computer.</p>
File Recall 	<p>Displays a list of files modified within a user-defined period of time. Double-clicking launches the file and the application it requires.</p>	<p>Stay organized, even if you don't always understand your own filing system.</p> <p>Use that time you spend hunting for files in some more productive way.</p>
View Switcher 	<p>Switch among all the different views the Mac OS has to offer, on a per-folder basis.</p>	<p>Organize your Mac exactly the way you want it, on-the-fly.</p>
Apple Audio CD Player 	<p>QuickKeys shortcuts can control a computer's audio CD player.</p>	<p>Quick and easy control of an audio CD player from the keyboard.</p>
