

## Welcome to Vue d'Esprit 2 Demo!

This demo lets you freely test an -almost- fully functional copy of Vue d'Esprit 2 for a period of 30 days!

Vue d'Esprit 2 is an amazing package, designed to easily produce breathtaking views of imaginary worlds.

The first version produced incredibly realistic pictures. This new version brings the software into a new dimension...

As you will notice, it is packed full of new features. Vegetation is one of them, probably the most desired.

SolidGrowth(tm), the vegetation generator is there, so unique and incredibly realistic that it's hard to believe!

Another milestone in affordable render quality?

Be sure to discover many more astounding features at every detour of what looks to be a simple interface...

But the true power of Vue d'Esprit 2 remains hidden away: multithreaded technology brings fast response. And you won't even notice it, since it works in the background, for your utter pleasure.

Here are some of the outstanding features of Vue d'Esprit 2:

- Multi-threaded technology for lightning fast response
- Comprehensive World browser to navigate inside scenes
- *SolidGrowth*<sup>TM</sup> vegetation generator
- Soft shadows, depth of field, blurred reflection/transparency

The restrictions of the demo are:

- Picture size limited to 640x480
- Saving scenes is not allowed
- Anti-aliasing, soft shadows, depth of field, blurred reflections and transparencies are not available.

The full version of Vue d'Esprit 2 is supplied with a 170 pages documentation, over 250 materials, over 30 atmospheric presets, 16 sample scenes and more vegetation species. Please refer to the electronic help files for information on ordering the full product.

Happy virtual trip!

*The e-on software team.*
