- View and print project code without using the Delphi IDE.
- Treeview listing of units,forms(text) and methods.
- Print complete projects or select individual units, forms or methods.
- Rearrange the print order.
- Add print header, date/time, page numbers and line numbers.
- Print the Treeview.
- Color syntax printing.
- View DFM files as text.

Operations
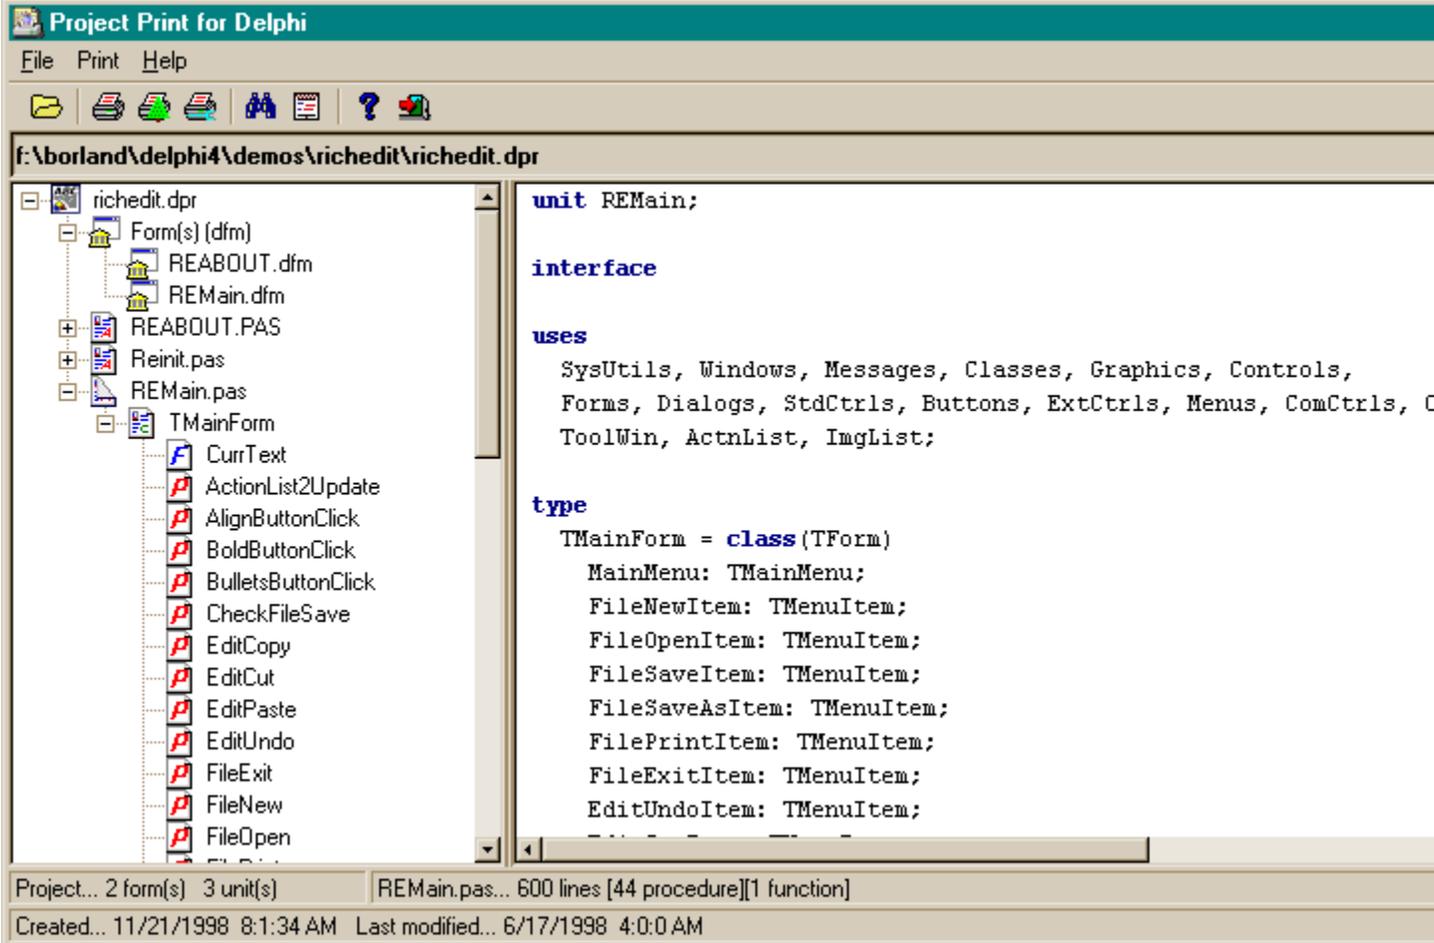

File Menu

Open
   Open files with .dpr, .dfm, or .pas extensions.
Reopen
   MRU list with up to 10 files.
   Clear list will empty the list.
Options
   Sort Tree
      Sort method nodes if checked, otherwise nodes will be in the order that they appear in the file.
   Show Forms (dfm)
      Show form nodes on treeview. If your not interested in these, leave it unchecked and files will load faster.
   Show Options (dof)
      Show option node on treeview. If your not interested in this, leave it unchecked and files will load faster.
   Show Hints
      On or off.
   View
      View a window with a checkbox for the above items. An easy way to change more than one item.
Exit

Open

Open files with .dpr, .dfm, or .pas extensions.

Print Menu

Selected Items

Print treeview items selected with a or

 .

Tree

Print the treeview. Prints without graphics and with statistics. (As seen on the statusbar)

Printer Setup

Options

Print the items checked.

Header (You can select text from Print Options window**)**
Date **(**Prints in header**)**
Page # **(**Prints in footer**)**
Line #'s

View

View the Print Options window.

Print Selected Items

Print treeview items selected with a or
 .

Printing is syntax highlighted.

Print TreeView
  Prints without graphics and with statistics. (As seen on the statusbar)
  You can set tree node level font size, style and name from the Print Options window.

Print Setup

Select printers or options available on your system.

- ☐ Underline

Syntax Colors and Font

Find

Find selected items in your code.

TreeView

Selecting Items for printing. (Example)

Two bitmaps are used to show selected items.

indicates that all child nodes will also be printed.
Example: If you select the DPR file then all PAS and DFM, if that option is turned on, will be printed.
Example: If you select a PAS file then all methods will be printed.

only the selected items(nodes) will be printed.

You SELECT an item for printing by holding the CTRL key and clicking on a NODE icon.
I you want to print the **DPR** file only, without its children, hold the **SHIFT** key and click the **DPR NODE** icon.

To DESELECT an item hold the ALT key and click on the NODE icon.

Printing will be in the order of the treeview from top down.

Nodes can be moved within its parent, so you can arrange them in any order for printing.

If you select method nodes you will not be able to select its parent but you can select other PAS nodes.

Multiple items can be selected anywhere in the tree.

Displaying/Locating code.

Single-click on the node of any PAS or DFM file to display it in the code viewer.

Double-click on the node of any method to display its code in the code viewer.

TreeView example
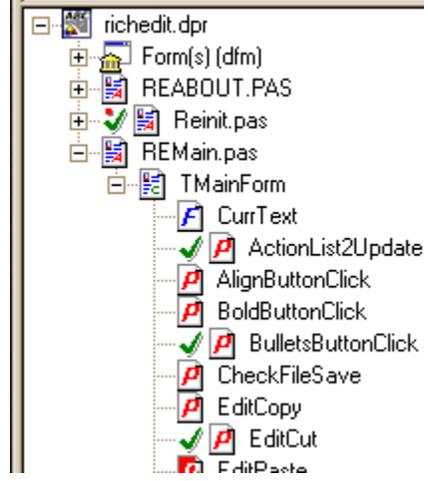

Code Viewer

Syntax highlighting and other options can be selected from the Print Options/Syntax Colors and Font button.

The viewer is not enabled as an editor, you cannot damage your code.

Syntax Colors and Font

I believe this window should be self explanatory.
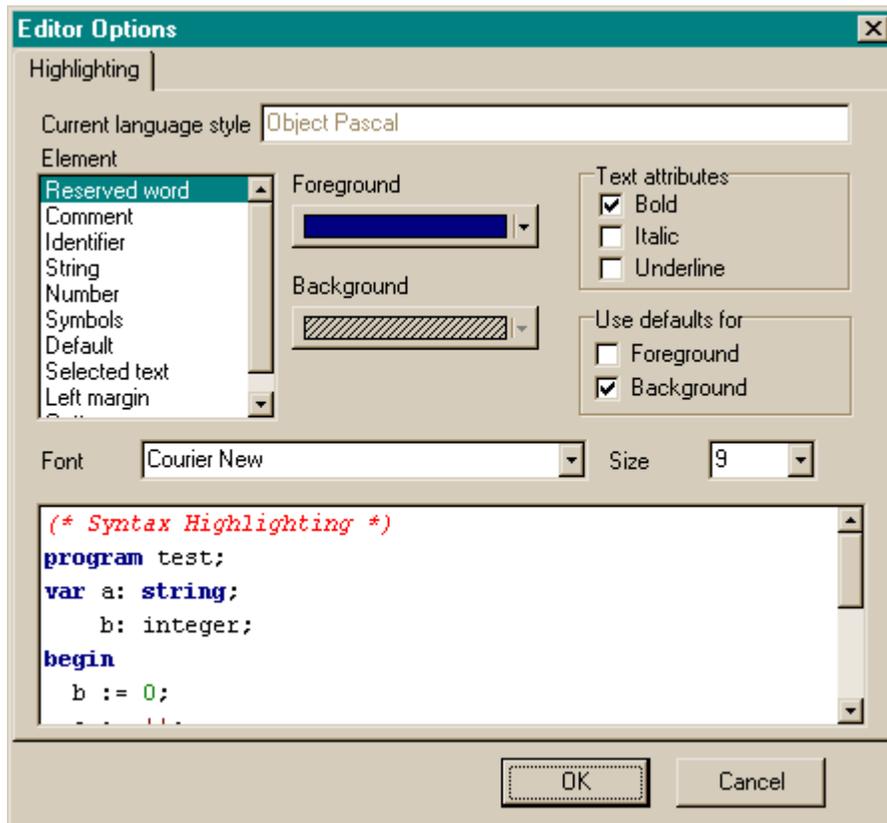

Treeview Print Options

First select a font name, size, color and style from the group on the right
then click on a node level label on the left to assign the selection.
When you close the window all selections will be maintained.

Reset button will reset all levels to default values.

Header Text

Your four text options are:
1. The File as shown with full path.
2. The File as shown without the path.
3. The Node selected.
4. Custom text that you enter in the edit box.

When you close the window all selections will be maintained, including custom text.

Print Format Options

If checked:

Header will print selection in header group.
Date will print at the right of the header.
Page # will print in a footer.
Line #'s will print.
