

SimpleEdit: introduction

SimpleEdit is VERY simple texteditor, included with the TMagicMacros 2.0 component for Delphi, written by Niels Vanspauwen.

With SimpleEdit you can type text, change the font, and use bold or italic styles.

[More info on Bold Text.](#)

[More info on Italic Text.](#)

[More info on Changing the font](#)

Italic text

You can set text in *italic* by selecting text in the editor, and clicking on the speedbutton or choose Options - Italic in the menu.

If you want to see a demo of this feature: {button Click this button!,SH('TSimpleEditForm','',-1002,0)}

Changing the font

You can change the font by selecting text in the editor, and clicking on the speedbutton or choose Options - Font in the menu. A FontDialog opens where you can change all the settings.

If you want to see a demo of this feature: {button Click this button!,SH('TSimpleEditForm','',-1003,0)}

Bold text

You can set text in **bold** by selecting text in the editor, and clicking on the speedbutton or choose Options - Bold in the menu.

If you want to see a demo of this feature: {button Click this button!,SH('TSimpleEditForm','',-1001,0)}
