

This part of the label folds over

To use this template, type text direct onto the page within the borders, or use a text box as I have here. Do not place objects too close to the edges as they may get cut off. You can though run graphics off the edge left and right of the label. Do not delete the label guide if sending the template to me for printing. Make sure Show Guides is set to on.

The black border represents the area of the disk. The blue lines running accross the page, are the guides as to approx where the fold will fall on the label.
