The Ultimate Typer Tool For Final Writer Release 3+

        Written By Fabio Rotondo.

              Version 2.00

Note   Please Read This!
What Is Final Typer ? Good Question!
What You Need   Amiga, Final Writer...
How To Install   Just a few seconds!
How Final Typer Works What do you have to do!

Conclusions   What I Think about this proggy

Greetings   Some hellos!

1.2 How Final Typer Works

```
HOW TO USE THIS PROGRAM
-----------------------
```
After the installing process, you will be able to run FinalTyper. Select
"Final Typer" from the "USER" menu and wait for its loading up. A little
window will pop up.
Final Typer has 7 gadgets: 6 buttons and one Integer gadget.
Clicking on the button will allow you accessing another window which will hold
all chars FinalTyper can insert inside your doc. These chars are divided into
"arguments". Clicking upon "A" gadget will show you all "A"s-related chars
(all the "a"s with accents), clicking on "E" will show you all "E"s-releted
chars and so on.
If you cannot find out a char inside "A" to "U" windows, try pressing the "X"
gadget which will show you another list of gadgets (the so called "eXtreme
mess!!!" :)

The Integer gadget needs a further explanation. Pay attention!!!

Every Final Writer text window has its own ARexx port. This port is called
FINALW.x where x is the number of the window and ranges from 1 to n. At
startup, Final Writer opens just ONE window, so you could access it by ARexx as
"FINALW.1" and also FinalTyper will work fine at startup. But, if you open
another window it will be called "FINALW.2" and if you desire to type in some
chars using FinalTyper IT WON'T WORK!!!

Ok, ok... don't be afraid. Everything is under control... don't be afraid.

The solution is the Integer Gadget. Just insert inside it the window you wish
to insert chars to and everything will work fine.

1.3 Conclusions

```
CONCLUSIONS:
------------
```
I think FinalTyper should be quite easy to use. Remeber to close it BEFORE
closing Final Writer, otherwise strange effects may occur.

If you want to contact me, you should do this way:

by mail:
    Fabio Rotondo
    C.so Vercelli 9
    28100 Novara

```
    ITALY

by phone:
    Tel. (ITA) - (0) 321 459676

by e-mail:
    fsoft@intercom.it
```

1.4 Greetings

```
GREETINGS:
----------
Very big hellos to:

    Sara, Ettore & Lele of ELA TEAM, Stefano Clemente, Andrea Brajuka, Silfrat,
    Kronos the Wizard, Maury The Venerable Teacher, Mr Hot Shot, Freddy Group,
    Vittorio Ferrari.

  ///
 \XX/ Amiga. Feel The Power!
 -------------------------

                   Fabio Rotondo.
```

1.5 Note

```
NOTE:
-----
Final Typer is a FREEWARE product. This means you can freely use, copy and
share it, until you dont charge any fee for spreading.
The author gives also a free permission to all PD-Compilations creators for
including this software inside their compos.
If you wish to include this program inside a commercial product, please
contact the author for a written permission.

Hey, if you like this program, send me an e-mail! See  Conclusions
for my complete e-mail address.

Note Well:
----------
In this manual I state Final Typer works with Final Writer version 3+, but
it _should_ work also with earlyer versions and future releases...
I just have only V3, so I have tested it on this one only!

THIS SOFTWARE MAY BE SHARED "AS IS". NO FILE MAY BE REMOVED/ADDED WITHOUT THE
WRITTEN PERMISSION OF THE AUTHOR!!!!
```

1.6 DISCLAIMER

```
Standard Disclaimer
*******************
```

```
THERE IS NO WARRANTY FOR THE SOFTWARE TO THE EXTENT PERMITTED BY APPLICABLE
LAW.  EXCEPT WHERE OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR
OTHER PARTIES PROVIDE THE SOFTWARE "AS IS" WITHOUT WARRANTY OF ANY KIND,
EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED
WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.  THE
ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE SOFTWARE IS WITH YOU.
SHOULD THE SOFTWARE PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY
SERVICING, REPAIR OR CORRECTION.
```

```
IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL
ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY REDISTRIBUTE THE SOFTWARE
AS PERMITTED BELOW, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL,
SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR
INABILITY TO USE THE SOFTWARE (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR
DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES
OR A FAILURE OF THE SOFTWARE TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF
SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH
DAMAGES.
```

1.7 What Is Final Typer ?

```
WHAT IS FINAL TYPER?
--------------------
Final Typer is a very small program which allows you to type into your texts
also those so strange chars that are present in foreing languages. It is a
better solution than learning mad-driven ALT-sequences.
```

1.8 What You Need

```
WHAT YOU NEED
-------------
- One (or more... ;) Amiga
- Final Writer 3 (earlier version may not work :( )
- Final Writer MUST open into a CUSTOM Screen!!!
```

1.9 Installation

```
INSTALLATION
------------
To install Final Typer is not very simple, but neither so difficult.
Follow all these steps and you will be a very happy user of Final Typer.

    1 - Copy "FinalTyper" file inside the dir you wish to hold it.
    2 - Edit file "CallFinalTyper" and insert the correct path where
```

FinalTyper should be found by Final Writer and save it.
3 – Copy edited "CallFinalTyper" file inside FinalWriter/FWMacros
    directory.
4 – Load FinalWriter and choose "Preferences/User Menu" from the
    "Project" Menu. A window will pop up.
5 – Press "New" Gadget into the Actions section.
6 – Insert "Final Typer" into "Menu Item Name" String gadget.
7 – Select "ARexx Script" into "Command Definition" section.
8 – Click on "Select..." into "Command" section and select "CallFinalTyper"
    into FinalWriter/FWMacros directory or wherelse you copy it.
9 – Press the "SAVE" button.

YOU GOT IT!!!! FinalTyper is Installed.

1.10   What's New

Final Typer V2.00 has been completely rewritten. There are SO MANY users
I feel the need to write a new version of this great program.
Well... my efforts took me here: so far, so good.

New features:

        * Multi Window
          Now Final Typer does not tie the user to use just ONE single
          window of chars per time... now you can have also ALL chars
          windows opened at the same time!!!

        * Font sensitive
          now FinalTyper uses your FW default font! So Final Typer has the
          same Final Writer look!

        * Resizable interface
          You can size the interface as you like.

        * Shorter code
          Final Typer has been completely rewritten. Now the code is
          in Amiga E and it is more compact and useful. It requires
          also less memory to execute!

        * More System Friendly
          Now Final Typer is more system friendly than ever!
          No enforcer's hits... just the screen grabbing routine is
          not _really_ system friendly ;)

        * Final Writer V4 TESTED!
          This version of Final Typer has been tested also on FW4... and it
          works properely.

        * Library free (!!!)
          Even if the interface is font sensitive and resizable, you do not
          need to load any interface-library such as MUI/BGUI and so on!

        * Faster
          Final Typer is faster than its predecessor, thanks to its completely
          rewritten structure.

```
    * More Expandible
      Now Final Typer is modular. If you wish to have some chars added to
      the list, drop me a mail, and I will do it!

    * Free
      Final Typer is still Free Ware! You can use it without giving me
      any buck! But, please, send me an e-mail! ;)

 *** If you have liked Final Typer V1.00 you will LOVE this new version! ***
```

1.11   TO DO LIST

```
Well, I do not know what I should add to Final Typer.
One of the things I think I'll do is a MUI based version of Final Typer.
In this way, the code would be even shorter and the ARexx interface faster.
But, hey, I should have MUI already loaded on my Amiga. I do not intend to
waste more thank 100K of mem to use a little prog such as Final Typer!

TO DO

    * MUI implementation
    * More chars
    * Your ideas...

    Let me know what you want!
```
