     The Standard Menus
     The Standard Keyboard
     The Standard Mouse Buttons

 Advanced:

  Customizing Blacks Editor
     The definitions file
```

1.2 Introduction

Introduction

Blacks Editor is a powerful, user-friendly, very configurable text
editor.

The main features are:

* Multi-window. You can have how many opened windows as your memory
  lets.

* Configurability. You can define the layout of the menus, the
  function of every keystroke, the function of every kind of mouse
  click. Moreover, each window can have different definitions.

* A lot of preferences. They are too many to list here... give BED a
  try and see them.

* SAS C Support. You can easily arrange it for any other compiler or
  language.

* Backup. When you save a file, a number of backups can be
  maintained.

* Autosave. Your files can be automatically saved at the interval
  you select.

* Advanced Icon Saving. An icon san be saved, according to the
  filename extension of your file.

* End of Line Handling. You can easily load or save files with EOL
  different from LF, for example files saved on PCs.

* ARexx support. There are 149 commands, usable in ARexx Macros or
  in the definition of menus, keystrokes and mouse clicks. The main
  abilities are the following:

  - Edit and Move commands
  - Clipboard Function
  - Recorded Macros
  - Paragraph Formatting
  - Bookmarks
  - Find & Replace
  - Matching Brackets
  - Undo & Undelete line
  - Run external Tools, DOS Scripts, ARexx Macros
  - Encrypting

* And, above all, it's made by ME.

Give it a try... a look can explain better than thousands of words.

1.3 The Author

Author

e-mail: s592345@vm.uni-bocconi.it
www: http://www.ing.unico.it/~mfontana/marco.html

This is me...

1.4 Credits

Credits

These are all the people who have been very important for the
realisation of Blacks Editor:

* Mauro Fontana
* Andrew Martin

For their suggestions, help and testing.

* Commodore

For having invented the Amiga

* Lara

My girlfriend, for having listened to me for months talking about
window refreshing, IDCMP, ARexx, etc.

* Pat Metheny & Mark Knopfler

For their wonderful guitars who conforted me in sleepless nights
spent on my keyboard.

Well... maybe I'm a bit exaggerating with the credits...

Let's go to see this Blacks Editor, finally...

1.5 Bug Reports

Bug Reports

This is a beta release, and beta releases are for finding
bugs and fixing them.

Even if I don't guarantee anything (read the disclaimer),
I think that BED at the moment doesn't contain major bugs
(i.e. you don't have to worry to lose your data).

But if you found some bugs, even minor, or if you have
some suggestions for this or another release of BED,
please tell me.

Click here for my address.

1.6 History

History

--- 1.0ß - 14-Jan-96 -------------------------------

First public release. Beta release. OS v39 required.

--- 1.0ß - 28-Jan-96 -------------------------------

First v37 compatible release.

1.7 Future

Future

First of all I have to finish this documentation...

When a final 1.0 release will be ready, I want to check
the success of this first version to decide whether
investing a LOT of my time in developing BED.

The ideas for next version are:

<*> Full Undo.

<*> ToolManager-like Docks, or simple groups of gadgets
    (of course user-definable) for each window

<*> Standard Clipboard support

<*> Word colouring

<*> More and more ARexx Macros, for syntax checking,
    auto-indenting, etc.

<*> Custom Progress Indicator support

<*> Gadgets Shortcuts.

<*> Implementation of the #LINKS keyword in the
    definitions file, which includes another file,
    something like the #include directive in C

<*> ... and whatever you will suggest me

1.8 Before you begin

Before you begin it's better if you read something about...

    Distribution

    Disclaimer

    Hardware requirements

    Installation

1.9 Distribution

Distribution

Blacks Editor v1.0ß - By Marco Negri - 28-Jan-1996

This entire package is designated Cardware, that is I ask you to

send me a postcard of your country or a message by E-Mail, because I
like to know where my program is used.

You may freely copy and distribute it as often as you like, with the
following limitations:

* The package must remain complete and unchanged

* The package can be included on CD-ROMs, BBS, magazines, but I ask
  you to inform the Author.

* Donations are welcome.

* It is expressly forbidden to use this program, or any programs or
  data developed using this program to directly or indirectly
  benefit the military.

1.10 Disclaimer

Disclaimer

THIS PROGRAM IS PROVIDED ON AN "AS IS" BASIS, NO WARRANTIES ARE
MADE, EITHER EXPRESSED OR IMPLIED. IN NO EVENT WILL I, MARCO NEGRI,
BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL
DAMAGES ARISING FROM ANY USE OR MISUSE OF THIS PROGRAM. THE ENTIRE
RISK AS TO THE RESULTS AND PERFORMANCE OF THIS PROGRAM IS ASSUMED BY
YOU.

1.11 Requirements

Requirements

* An Amiga   ;-)
* OS 2.04+ (V37)
* Reqtools.library v38+   (Copyright by Nico François)
* Commodore Installer   (needed only for the installation)

(Recommended for better use)

* A Hard Disk
* ARexx running

Also available:

* Versions optimized for 68020, 68030, 68040

As Blacks Editor is written in C, these versions are obtained

compiling the same source with the optimization for a specific
processor.

These versions have not been included for space reasons, but you can
ask me for them.

If you are on Internet I can send it to you for free, else you have
to send me the money for the shipping of the disk.

1.12   Installation

Installation

To install Blacks Editor simply open the Install drawer and
double-click on the icon of your language.

A Standard Installer Script will guide you through the short
installation process.

1.13   Quick Starting

Quick Starting

This section is for you who hate reading documentations
and want to know only the most important things.

So here they are:

<*> You can start BED from the Shell or from the Workbench

<*> The layout of the menus, of the keyboard and the
    actions to take at each mouse click are called
    definitions, and are specified in a file with the
    ".dfn" extension in the "BED:Support" directory.

<*> A lot of preferences are specified in files with
    ".prf" extension in the "BED:Support" directory

<*> In the "Rexx" directory there are a lot of useful
    ARexx Macros. They can be executed using the ARexx
    menu.

<*> If not differently specified, BED load at startup the
    definitions from "BED:Support/Startup.dfn", the
    preferences from "BED:Support/Startup.prf", and
    executes the ARexx Macro "BED:Rexx/Startup.bed, if it
    exists.

<*> If not differently specified, BED executes at the
    opening of a new window the ARexx Macro

"BED:Rexx/Doc_Startup.bed", if it exists. In the
original configuration this macro does the same as
SetConfig, i.e. it loads the preferences and the
definitions according to the current filename
extension. You can, of course, modify or delete this
macro.

1.14 Starting Blacks Editor

Starting Blacks Editor

Blacks Editor can be started either from WB or from the Shell.

   Starting from the Shell

   Starting from Workbench

1.15 Starting from the Shell

From the Shell

If you want to run Blacks Editor from the Shell you just
have to type:

   BED

followed by these optional arguments

FILENAME,DEFS/K,PREFS/K,MACRO/K,QUIT/S

1.16 Starting from the Workbench

From the Workbench

If you want to run Blacks Editor from the Workbench you
have to double click on the BED icon or on any Project
Icon with BED as Default Tool.

The following Tooltypes are supported:

 FILENAME – File to edit
 DEFS   – Definitions file
 PREFS   – Preferences file
 MACRO   – Macro to execute at startup
 QUIT   – Quit BED

1.17 FILENAME

```
FILENAME
```

```
FILENAME: If a filename is specified then this file is
          loaded in the first document window.
          If there is a copy of BED running, then it will
          open a new document window and load the specified
          file.
```

1.18 DEFS/K

```
DEFS
```

```
DEFS/K:   If a defs file is specified then the definitions
          are loaded from it.
          It defaults to BED:Support/Startup.dfn.
```

1.19 PREFS/K

```
PREFS
```

```
PREFS/K:  If a prefs file is specified then the preferences
          are loaded from it.
          It defaults to BED:Support/Startup.prf
```

1.20 MACRO/K

```
MACRO
```

```
MACRO/K:  If this argument is specified then the ARexx Macro
          is executed.
          It defaults to BED:Support/Startup.bed
```

1.21 QUIT/S

```
QUIT
```

```
QUIT/S:   When there is a copy of BED running, this switch
          force him to quit.
```

1.22 The Standard Configuration

```
    Standard configuration

    This is the standard configuration of Blacks Editor, and can be
    found in the definition file BED:Support/Standard.dfn.

    This file define the menus, the keyboard sequences and the actions
    to take at each type of mouse click.

        The Standard Menus

        The Standard Keyboard

        The Standard Mouse Buttons
```

1.23   Standard Menus

```
    Standard menus:

     File
     Window
     Edit
     Find
     Format
     Extras
     Macro
     Tools

```

1.184 Commands Reference

```
Commands Reference

Blacks Editor 1.0ß supports 149 ARexx commands.

You can use these commands to write your own definition file, to
modify an existing one, or to write ARexx Macros.

The global commands are the only who can be sent to the general
ARexx port called BED. The others can only be sent to the specific
ARexx port of some document.

The commands are listed according different criteria:

    Alphabetical order

    Functional groupings

Alphabetical List of Commands

```
About             - Bring up the About requester
ActivateLastDoc   - Activates and bring to front the last document
ActivateNextDoc   - Activates and bring to front the next document
ActivatePrevDoc   - Activates and grong to front the previous document
ActivateWindow    - Activates the window of the current document
BackSpace         - Delete the character before the cursor
BeepScreen        - Flashes the screen
Center            - Center the current paragraph
CenterView        - Center vertically the current line
ClearBookMark     - Clear the specified bookmark
ClearFile         - Clears the current file
CloseDoc          - Closes the current document
Conv2Lower        - Convert the character to lower case
Conv2Spaces       - Convert the tabs to spaces
Conv2Tabs         - Convert the spaces to tabs
Conv2Upper        - Convert the character to upper case
CopyBlk           - Copy the selected block to the clipboard
CutBlk            - Copy the selected block to the clipboard and erase it
Delete            - Delete the character under the cursor character
DeleteBlk         - Erase the selected block
DeleteEOL         - Delete from the cursor to the end of the line
DeleteEOF         - Delete from the cursor to the end of the file
DeleteEOW         - Delete from the cursor to the end of the word
DeleteLine        - Delete the current line
DeleteSOL         - Delete from the cursor to the start of the line
DeleteSOF         - Delete from the cursor to the start of the file
DeleteSOW         - Delete from the cursor to the start of the word
DeleteWord        - Delete the word under the cursor
EncryptBlk        - Encrypt the selected block
EndMacro          - Stops the recording of a macro
ExecARexxMacro    - Execute am ARexx script
ExecARexxString   - Execute an ARexx string
ExecDosScript     - Execute a DOS script
ExecTool          - Execute syncronously a Tool
Exist             - Check if a the specified command is supported by BED
Find              - Search in the current document for the specified string
FindChange        - Search in the current document for the specified string and ←
    replace it with another
FormatParagraph   - Format the current paragraph
GetBlk            - Return the text in the selected block
GetBlkDims        - Return info about the selected block
GetBlkInfo        - Return info about the selected block
GetChar           - Return the current character
GetCurrentDir     - Return the name of the current dir
GetCursorPos      - Return info about the current position of the cursor
GetDocuments      - Return the names of the documents and their ARexx port name
GetErrorInfo      - Return the string of the specified error code
GetFileInfo       - Return info about the current document
```

```
GetFilePath       - Return the path and/or filename of the current document
GetLine           - Return the text of the current line
GetLockInfo       - Return info about the locks
GetMacroInfo      - Return info about the current macro recorded
GetPort           - Return the ARexx port name of a document
GetPrefs          - Return the value of the specified preference
GetPriority       - Return the task priority of BED
GetScreenInfo     - Return info about the screen
GetTemplate       - Return the template of the specified command
GetVersion        - Return the version string of BED
GetViewInfo       - Return info about the current view
GetWindowInfo     - Return info about the current document window
GetWindowSpec     - Return the specification of the current document window
GetWord           - Return the word under the cursor
Help              - Display an AmigaGuide document with an help about the  ←
   specified topic
IconifyWindow     - Iconify/uniconify the current document window
Illegal           - Produces an error
Insert            - Insert the specified string in the document
InsertTab         - Insert a tab in the text
InsertFile        - Inserta file in the document
InsertLine        - Insert a new line in the document
Justify           - Justify the current paragraph
LeftJustify       - Left justify the current paragraph
MarkBlk           - Mark the start of the selection block
Move              - Move the cursor to the specified line and/or column
MoveBookMark      - Move the cursor to the specified bookmark
MoveDown          - Move the cursor down one or more lines line
MoveDownScr       - Move the cursor down one page
MoveEOF           - Move the cursor to the end of the document
MoveEOL           - Move the cursor to the end of the current line
MoveEOW           - Move the cursor to the end of the word
MoveLeft          - Move the cursor left one or more characters
MoveMatchBkt      - Move the cursor on the matching bracket
MoveNextTabStop   - Move the cursor to the next tab stop position
MoveNextWord      - Move the cursor to the start of the next word
MovePrevTabStop   - Move the cursor to the previous tab stop
MovePrevWord      - Move the cursor to the start of the previous word
MoveRight         - Move the cursor right one or more characters
MoveSizeWindow    - Change the dimensions and position of the current document  ←
   window
MoveSOF           - Move the cursor to the start of the file
MoveSOL           - Move the cursor to the start of the current line
MoveSOW           - Move the cursor to the start of the current word
MoveUp            - Move the cursor up one or more lines
MoveUpScr         - Move the cursor up one page
MoveWindow        - Change the position of the current document window
NewShell          - Opens a new shell
Nop               - Absolutely nothing
OpenClip          - Load the specified file in the clipboard
OpenDefinitions   - Load the specified definitions file for the current document
OpenDoc           - Open a new document
OpenFile          - Load the specified file in the current document
OpenMacro         - Load the specified macro
OpenPrefs         - Load the specified preference file for the current document
OpenRequester     - Open the specified requester
PasteClip         - Paste the clipboard in the current document
```

```
PlayMacro        - Play the recorded macro
PrintClip        - Print the contents of the clipboard
PrintFile        - Print the current document
Quit             - Close all the documents and exit
RecordMacro      - Start recording a macro
RemakeScreen     - Remake the screen
RequestBool      - Open a bool requester
RequestChoice    - Open a requester with multiple choices
RequestFile      - Open a file requester
RequestFont      - Open a font requester
RequestNum       - Open a number requester
RequestStr       - Open a string requester
RightJustify     - Right justify teh current paragraph
RunTool          - Run asynchronously the selected Tool
SaveClip         - Save the contents of the clipboard in a file
SaveDefPrefs     - Save the preferences on disk, as defaults
SaveFile         - Save the current document
SaveFileAs       - Save the current document with a different filename
SaveMacro        - Save the currently recorded macro
SavePrefs        - Save the preferences on disk
Screen2Back      - Move the screen to back
Screen2Front     - Move the screen to front
ScrollVert       - ...
ScrollView       - Scroll vertically the current view
SelectLine       - Select the currrent line
SetBookMark      - Set the specified bookmark
SetChar          - Set the char under the cursor
SetCurrentDir    - Set the current directory
SetDisplayLock   - Set the lock on the display of the current file
SetFilePath      - Set the path of the curret document
SetInputLock     - Set the lock on the input in the current document
SetPrefs         - Set the specified preference
SetPriority      - Set the task priority of BED
SetQuoteMode     - Set the quote mode
SetStatusBar     - Display the specified string in the status bar
SetWindowSpec    - Dimension the current document window according to the  ←
    specification
ShiftLeft        - Shift left the current line one or more characters or tabs
ShiftRight       - Shift right the current line one or more characters or tabs
SizeWindow       - Change the dimensions of the current document window
StripEOLBlanks   - Strip all the blanks at the end of the lines
SwapChars        - Swap the character under the cursor with the next
Text             - Insert the specified string in the current document
ToggleCharCase   - Toggle the upper/lower case of the character under the  ←
    cursor
UndeleteLine     - Undelete the current line
UndoLine         - Undo all the changes on the current line
Window2Back      - Move the current document window to back
Window2Front     - Move the current document window to front
```

1.186   Functional Grouping of Commands

```
Functional Grouping of Commands

Commands dealing with load & save
```

```
    GetFileInfo        - Return info about the current document
    GetFilePath        - Return the path and/or filename of the current document
    InsertFile         - Inserta file in the document
    OpenFile           - Load the specified file in the current document
    PrintFile          - Print the current document
    SaveFile           - Save the current document
    SaveFileAs         - Save the current document with a different filename
    SetFilePath        - Set the path of the curret document

  Commands dealing with the editing

    BackSpace          - Delete the character before the cursor
    Delete             - Delete the character under the cursor character
    DeleteEOL          - Delete from the cursor to the end of the line
    DeleteEOF          - Delete from the cursor to the end of the file
    DeleteEOW          - Delete from the cursor to the end of the word
    DeleteLine         - Delete the current line
    DeleteSOL          - Delete from the cursor to the start of the line
    DeleteSOF          - Delete from the cursor to the start of the file
    DeleteSOW          - Delete from the cursor to the start of the word
    DeleteWord         - Delete the word under the cursor
    Insert             - Insert the specified string in the document
    InsertTab          - Insert a tab in the text
    InsertLine         - Insert a new line in the document
    ShiftLeft          - Shift left the current line one or more characters or tabs
    ShiftRight         - Shift right the current line one or more characters or ←
        tabs
    Text               - Insert the specified string in the current document
    UndeleteLine       - Undelete the current line
    UndoLine           - Undo all the changes on the current line

  Commands dealing with cursor movements

    GetCursorPos       - Return info about the current position of the cursor
    Move               - Move the cursor to the specified line and/or column
    MoveDown           - Move the cursor down one or more lines line
    MoveDownScr        - Move the cursor down one page
    MoveEOF            - Move the cursor to the end of the document
    MoveEOL            - Move the cursor to the end of the current line
    MoveEOW            - Move the cursor to the end of the word
    MoveLeft           - Move the cursor left one or more characters
    MoveMatchBkt       - Move the cursor on the matching bracket
    MoveNextTabStop    - Move the cursor to the next tab stop position
    MoveNextWord       - Move the cursor to the start of the next word
    MovePrevTabStop    - Move the cursor to the previous tab stop
    MovePrevWord       - Move the cursor to the start of the previous word
    MoveRight          - Move the cursor right one or more characters
    MoveSOF            - Move the cursor to the start of the file
    MoveSOL            - Move the cursor to the start of the current line
    MoveSOW            - Move the cursor to the start of the current word
    MoveUp             - Move the cursor up one or more lines
    MoveUpScr          - Move the cursor up one page
    ScrollVert         - ...
    ScrollView         - Scroll vertically the current view

  Commands dealing with bookmarks
```

```
    ClearBookMark    - Clear the specified bookmark
    MoveBookMark     - Move the cursor to the specified bookmark
    SetBookMark      - Set the specified bookmark

  Commands dealing with special edit functions

    ClearFile        - Clears the current file
    Conv2Lower       - Convert the character to lower case
    Conv2Spaces      - Convert the tabs to spaces
    Conv2Tabs        - Convert the spaces to tabs
    Conv2Upper       - Convert the character to upper case
    EncryptBlk       - Encrypt the selected block
    SetChar          - Set the char under the cursor
    StripEOLBlanks   - Strip all the blanks at the end of the lines
    SwapChars        - Swap the character under the cursor with the next
    ToggleCharCase   - Toggle the upper/lower case of the character under the ←
        cursor

  Commands dealing with selection block and the clipboard

    CopyBlk          - Copy the selected block to the clipboard
    CutBlk           - Copy the selected block to the clipboard and erase it
    DeleteBlk        - Erase the selected block
    GetBlk           - Return the text in the selected block
    GetBlkDims       - Return info about the selected block
    GetBlkInfo       - Return info about the selected block
    MarkBlk          - Mark the start of the selection block
    OpenClip         - Load the specified file in the clipboard
    PasteClip        - Paste the clipboard in the current document
    PrintClip        - Print the contents of the clipboard
    SaveClip         - Save the contents of the clipboard in a file
    SelectLine       - Select the currrent line

  Commands dealing with search & replace

    Find             - Search in the current document for the specified string
    FindChange       - Search in the current document for the specified string ←
        and replace it with another

  Commands dealing with formatting of paragraph

    Center           - Center the current paragraph
    FormatParagraph  - Format the current paragraph
    Justify          - Justify the current paragraph
    LeftJustify      - Left justify the current paragraph
    RightJustify     - Right justify teh current paragraph

  Commands dealing with recorded macros

    EndMacro         - Stops the recording of a macro
    GetMacroInfo     - Return info about the current macro recorded
    OpenMacro        - Load the specified macro
    PlayMacro        - Play the recorded macro
    RecordMacro      - Start recording a macro
    SaveMacro        - Save the currently recorded macro
```

Commands dealing with external Tools or ARexx macros

    ExecARexxMacro   - Execute am ARexx script
    ExecARexxString - Execute an ARexx string
    ExecDosScript   - Execute a DOS script
    ExecTool   - Execute syncronously a Tool
    NewShell   - Opens a new shell
    RunTool   - Run asynchronously the selected Tool

Commands dealing with the configuration of the program

    GetPrefs   - Return the value of the specified preference
    OpenDefinitions - Load the specified definitions file for the current ←
        document
    OpenPrefs   - Load the specified preference file for the current ←
        document
    SaveDefPrefs   - Save the preferences on disk, as defaults
    SavePrefs   - Save the preferences on disk
    SetPrefs   - Set the specified preference

Commands dealing with windows ands screen

    ActivateLastDoc - Activates and bring to front the last document
    ActivateNextDoc - Activates and bring to front the next document
    ActivatePrevDoc - Activates and grong to front the previous document
    ActivateWindow   - Activates the window of the current document
    BeepScreen   - Flashes the screen
    GetScreenInfo   - Return info about the screen
    GetWindowInfo   - Return info about the current document window
    GetWindowSpec   - Return the specification of the current document window
    IconifyWindow   - Iconify/uniconify the current document window
    MoveSizeWindow   - Change the dimensions and position of the current document ←
        window
    MoveWindow   - Change the position of the current document window
    RemakeScreen   - Remake the screen
    Screen2Back   - Move the screen to back
    Screen2Front   - Move the screen to front
    SetStatusBar   - Display the specified string in the status bar
    SetWindowSpec   - Dimension the current document window according to the ←
        specification
    SizeWindow   - Change the dimensions of the current document window
    Window2Back   - Move the current document window to back
    Window2Front   - Move the current document window to front

Commands dealing with views

    CenterView   - Center vertically the current line
    GetViewInfo   - Return info about the current view

Commands dealing with documents

    CloseDoc   - Closes the current document
    GetDocuments   - Return the names of the documents and their ARexx port ←
        name
    GetPort   - Return the ARexx port name of a document
    OpenDoc   - Open a new document
    Quit   - Close all the documents and exit

Command allowing input in ARexx Macros

```
   RequestBool      - Open a bool requester
   RequestChoice    - Open a requester with multiple choices
   RequestFile      - Open a file requester
   RequestFont      - Open a font requester
   RequestNum       - Open a number requester
   RequestStr       - Open a string requester
```

Commands dealing with text in ARexx macros

```
   GetChar          - Return the current character
   GetLine          - Return the text of the current line
   GetWord          - Return the word under the cursor
```

Commands useful when developing ARexx Macros

```
   Exist            - Check if a the specified command is supported by BED
   GetErrorInfo     - Return the string of the specified error code
   GetTemplate      - Return the template of the specified command
   GetVersion       - Return the version string of BED
   Help             - Display an AmigaGuide document with an help about the  ←
      specified topic
   Illegal          - Produces an error
   Nop              - Absolutely nothing
```

Miscellanea commands

```
   About            - Bring up the About requester
   GetCurrentDir    - Return the name of the current dir
   GetPriority      - Return the task priority of BED
   OpenRequester    - Open the specified requester
   SetCurrentDir    - Set the current directory
   SetPriority      - Set the task priority of BED
   SetQuoteMode     - Set the quote mode
```

1.187 List of Global Commands

List of Global Commands

```
 ActivateLastDoc  - Activates and bring to front the last document
 ActivateNextDoc  - Activates and bring to front the next document
 ActivatePrevDoc  - Activates and grong to front the previous document
 ActivateWindow   - Activates the window of the current document
 BeepScreen       - Flashes the screen
 ExecARexxMacro   - Execute am ARexx script
 ExecARexxString  - Execute an ARexx string
 ExecDosScript    - Execute a DOS script
 ExecTool         - Execute syncronously a Tool
 Exist            - Check if a the specified command is supported by BED
 GetCurrentDir    - Return the name of the current dir
 GetDocuments     - Return the names of the documents and their ARexx port name
 GetErrorInfo     - Return the string of the specified error code
 GetPort          - Return the ARexx port name of a document
```

```
GetPriority       - Return the task priority of BED
GetScreenInfo     - Return info about the screen
GetTemplate       - Return the template of the specified command
GetVersion        - Return the version string of BED
Help              - Display an AmigaGuide document with an help about the  ←
    specified topic
Illegal           - Produces an error
Nop               - Absolutely nothing
OpenDoc           - Open a new document
Quit              - Close all the documents and exit
RemakeScreen      - Remake the screen
RunTool           - Run asynchronously the selected Tool
Screen2Back       - Move the screen to back
Screen2Front      - Move the screen to front
SetCurrentDir     - Set the current directory
SetPriority       - Set the task priority of BED
```

1.188 About

```
Command name:    About

Format:          About

Release:         Version 1.00

Purpose:         Bring up the About requester

Parameters:      None

Description:

RC:              Always 0

RESULT:          No result returned.

1.401   Errors Reference

```
    Errors Reference

    This is the reference for error codes and messages.

    The first list contains the errors caused during the normal use of
    the program, the second and the third contain errors occurred while
    parsing, respectively, definitions and preferences files.

        Blacks Editor errors

        Definitions file errors

        Preferences file errors
```

1.402   BED Errors

```
    BED Errors

    1   Error #1
    2   Error #2
