

DEVELOPER UNIVERSITY SELF-PACED PRODUCTS

Developer University is committed to bringing affordable training to your desktop. Using self-paced training comes in two formats 1) highly interactive self-paced courses with CD-ROM-based, fully animated, narrated lessons, demonstrations, lab exercises and sample code 2) tutorials with sample code and labs.

DU self-paced courses are available through the **Apple Developer Catalog**. To order, call the Apple Developer Catalog at (800) 282-2732 (U.S.A.), 800 637-0029 (Canada) or 1-(716) 871-6555 International.

Apple Events/AppleScript Programming Tutorial

Learn the basics of Apple's scripting architecture with this self-paced disk and workbook tutorial. Using core modules from DU's classroom course, you will learn how to make your applications script ready and recordable.

Part Number: R0224LL/B - \$95.00

Apple Guide Integration

This self-paced tutorial teaches you when and how to add Apple Guide help to your program. A positive user experience means getting the task done with a minimum of hassle. But as applications engage in the features race, their complexity increases as well, leading to increased user frustration. One solution is to add a powerful help system that can guide the user through a task. Apple Guide makes this chore easier than you might think. This tutorial will lead you through the steps necessary to integrate Apple Guide. CodeWarrior Lite is included on the CD with the lab exercises.

Part Number: R0696Z/A -- \$49.95

System 7.5 Technologies

DU's latest self-paced, mini-course is designed to allow software developers to write code that extends the functionality of the Macintosh for System 7.5. It contains comprehensive materials for drag and drop, threads, standard mail package, and QuickDraw GX printing. A student should be familiar with the basics of programming a Macintosh application to get the most benefit from this product. CodeWarrior Lite is included on the CD with the lab exercises.

Part Number: R0695Z/A - \$49.95

Object-Oriented Fundamentals 1.1

Learn what object-oriented programming is all about. If you are a C programmer who wants to move up to C++ this is the self-paced training course for you. DU's multimedia Object-Oriented Fundamentals course enables you to easily make the paradigm shift from procedural to object-oriented design. It will introduce you to the entire object skill set, from general concepts through analysis and design. This course assumes that you will be using Metrowerks CodeWarrior integrated development environment in the labs. A "lite" version of CodeWarrior is included with the course. Symantec's C++ integrated development environment will work with the labs as well but is not included. The course also includes a copy of the book *Learn C++ on the Macintosh* by Dave Mark.

Part Number: R0560LL/B - \$245.00
