

AN INTRODUCTION TO DEVELOPER UNIVERSITY

Developer University (DU) offers the latest in technical training for the Apple developer. We are committed to making affordable training available when and where it is needed. In modern classrooms in Cupertino, California, we offer training in Apple's hottest new technologies, as well as a curriculum of fundamental classes. Classroom-based courses are also offered at various Developer University Extensions. Through the Apple Developer Catalog, we make a number of our courses available in a self-paced format that puts **our** training on **your** desktop. We also have a number of online courses available to you for free on the World Wide Web.

DU provides expert instruction for beginning, intermediate, and advanced Mac[®] OS and Newton programmers. Our instructors enjoy working with students and sharing their development experience and expertise. You'll benefit from their years of experience in human interface design and object-oriented programming. We offer programming courses designed to teach you how to produce fast, efficient code.

In this folder, you will find contact information, course descriptions, course schedules, training site listings, information on prerequisites, and the complete course outline.
