

HTML-Optimizer 8.1.1 - OSX

© (2000 - 2004) Tonbrand Software

Short Description

HTML-Optimizer speeds up your web site by optimizing both HTML and script code of your web pages. It helps you keep organized by creating a duplicate site folder for the optimized files. An added benefit is that it leaves your original files untouched.

The program features Smart Handling which means that only those pages that have changed are processed.

You should use your original web folder for editing and use the duplicate web folder for uploading.

HTML-Optimizer is 'Unicode-savvy'.

Drag and Drop is supported.

Safe Mode

With version 8.1 a 'Safe Mode' option has been introduced.

If you did not need to use in the past the 'Restore Lost Space' option, you do not need to use the safe mode now, as this works about 60% slower.

Installing

Simply drag the HTML-Optimizer Folder to your Applications folder.

Manual

The program's manual is built-in - see the Help menu - and can be printed. Help Tags are available for most items in the Preferences window.

License

HTML-Optimizer is shareware and costs USD 17.00 for a Single User license, valid for max. 2 computers, e.g. your desktop and laptop.

You can pay online via the web store Kagi at the secure page <<https://order.kagi.com/?U5P>>.

Limited Use if Unregistered

An unregistered copy has a time limit of 20 days. Please register in time so that you can continue working with HTML-Optimizer without delay.

Required

HTML-Optimizer comes in three models. With this you have the OSX model for Mac OS X 10.1 or later.

There are also models for Mac OS 8.1 - 9.2.2 and Windows (all platforms except 95).

Legal Stuff

HTML-Optimizer is provided "as is", without warranty of any kind, express or implied,

including but not limited to the warranties of merchantability, fitness for a particular purpose and non-infringement. In no event shall the Author be liable for any claim, damages or other liability, whether in an action of contract, tort or otherwise, arising from, out of or in connection with HTML-Optimizer or the use or other dealings in HTML-Optimizer.

Who is the Author?

HTML-Optimizer was developed by Ton Brand from Tonbrand Software in The Netherlands. Since 1995, Tonbrand has offered a variety of freeware and shareware applications.

This program was written in REALbasic*.
