HTML-Optimizer Pro 3.1.1 - OSX
© (2000 - 2004) Tonbrand Software

Short Description
HTML-Optimizer Pro speeds up your web site by optimizing both HTML and script code of your web pages. It helps you keep organized by creating a duplicate site folder for the optimized files.   An added benefit is that it leaves your original files untouched.
The program features Smart Handling which means that only those pages that have changed are processed.
Besides optimizing, the program can also check for dangling tags, missing attributes and broken links and convert special characters.
You should use your original web folder for editing and use the duplicate web folder for uploading.
HTML-Optimizer Pro is 'Unicode-savvy'.
Drag and Drop is supported.

Safe Mode
With version 3.1 a 'Safe Mode' option has been introduced.
If you did not need to use in the past the 'Restore Lost White Space' option, you do not need to use the safe mode now, as this works about 60% slower.

Installing
Simply drag the HTML-Optimizer Pro Folder to your Applications folder.

Manual
The program's manual is built-in - see the Help menu - and can be printed. Help Tags are available for most items in the Preferences window.

Tutorial
A tutorial for First-Users is as text file available in the HTML-Optimizer Pro folder. It's recommended to print it so that you can read it while you're trying HTML-Optimizer Pro. In the HTML-Optimizer Pro folder you find a folder named TestWebFolder that you can use to test the various functions of the program.

License
HTML-Optimizer Pro is shareware and costs USD 25.00 for a Single User license, valid for max. 2 computers, e.g. your desktop and laptop.
Registered users of HTML-Optimizer can upgrade at USD 10.00.
You can pay online via the web store Kagi at the secure page <https://order.kagi.com/?U5P>.

Limited Use if Unregistered
An unregistered copy has a time limit of 20 days. Please register in time so that you can

continue working with HTML-Optimizer Pro without delay.

Required
HTML-Optimizer Pro comes in three models. With this you have the OSX model for Mac OS X 10.1 or later.
There are also models for Mac OS 8.1 - 9.2.2 and Windows (all platforms except 95).

Legal Stuff
HTML-Optimizer Pro is provided "as is", without warranty of any kind, express or implied, including but not limited to the warranties of merchantability, fitness for a particular purpose and non-infringement. In no event shall the Author be liable for any claim, damages or other liability, whether in an action of contract, tort or otherwise, arising from, out of or in connection with HTML-Optimizer Pro or the use or other dealings in HTML-Optimizer Pro.

Who is the Author?
HTML-Optimizer Pro was developed by Ton Brand from Tonbrand Software in The Netherlands. Since 1995, Tonbrand has offered a variety of freeware and shareware applications.
This program was written in REALbasic*.
