

HTML-Optimizer Pro 2.5 - OSX

© (2000 - 2003) Tonbrand Software

Short Description

HTML-Optimizer Pro is a useful tool for anyone who manages one or more web sites and wants to make sure that his or her sites are always in top condition. It checks your web pages for dangling tags, missing attributes and broken links, and - most importantly - it makes your pages load faster by optimizing both HTML and script code.

The program features Smart Handling which means that only those pages that have changed are processed, i.e. checked and/or optimized.

HTML-Optimizer Pro helps you keep organized by creating a duplicate site folder for the optimized files. An added benefit is that it leaves your original files untouched.

You should use your original web folder for editing and use the duplicate web folder for uploading.

Drag and Drop is supported.

Installing

You should put the HTML-Optimizer Pro Folder in your Applications folder.

Important

File names of items in your web folder may not be longer than 31 characters, including the suffix (extension). Please read the file 'ReadMeFirst' to learn more. Do this before you start the program.

Manual

The program's manual is as HTML file available in the HTML-Optimizer Pro folder but is also built-in - see the Help menu. Note that Help Tags are available for most items in the Preferences window.

Tutorial

A tutorial for First-Users is as text file available in the HTML-Optimizer Pro folder. It's recommended to print it so that you can read it while you're trying HTML-Optimizer Pro. In the HTML-Optimizer Pro folder you find a folder named TestWebFolder that you can use to test the various functions of the program.

Version History

Version 2.5

31 May 2003

* Reliable optimizing of JavaScript (.js) and VisualBasicScript (.vbs) files. Previous versions could corrupt code in certain cases.

Version 2.3.1

11 March 2003

- * Redesigned the Preferences window.
- * Fixed a bug related to viewing web pages with Safari.

Version 2.3

15 February 2003

- * Improved the optimizer engine that handles script code, e.g. JavaScript.

Version 2.2.2

8 February 2003

- * Added a tip about <NOOP> </NOOP> tags to the Tips window.
- * Fixed a bug that could corrupt script code when adding Alt or Width/Height attributes.
- * Added a warning for files in your web folder that have names longer than 31 characters.

(version 2.2.1 existed only as Windows model)

Version 2.2

11 January 2003

- * Smart Handling can be date+time sensitive or current date sensitive, at choice.
- * Added a warning dialog if you are about to save changes to your original web pages.
- * Added an 'Undo Don't Show Message Again Commands' menu command to the Configure menu.
- * Fixed a bug that corrupted script code when removing script comments.

Version 2.1.1

28 December 2002

- * Made link checking case-sensitive as far as file names are concerned.

Version 2.1

30 November 2002

- * Improved the Smart Handling feature by making it date+time sensitive instead of just date sensitive.
- * For better ease-of-use the Smart Handling control is above the Start/Select button.
- * Added support for .vbs files.
- * Removes by default meta generator tags.

Version 2.0

23 October 2002

- * Initial release. The version number started with 2.0 because in the past a similar optimizer from Tonbrand Software existed that had as last version number 1.9.

License

HTML-Optimizer Pro is shareware and costs USD 20.00 for a Single User license and is valid for any model, whether it's PPC, OSX or Windows. Users of HTML-Optimizer can upgrade for USD 10.00.

You can pay online via Kagi at the secure page <<https://order.kagi.com/?U5P>> or by

using the Register Utility.

Limited Use if Unregistered

An unregistered copy has a time limit of 20 days. Please register in time so that you can continue working with HTML-Optimizer Pro without delay.

Required

HTML-Optimizer Pro comes in three models. With this you have the OSX model for Mac OS X 10.1 or later.

There are also models for Mac OS 8 to 9 - PPC and Windows (all platforms).

Legal Stuff

HTML-Optimizer Pro is provided "as is", without warranty of any kind. Under no circumstances shall the Author be liable for any incidental, special, or consequential damages that result from the use of HTML-Optimizer Pro.

A user license is personal and giving the registration code to another person or making it public is illegal.

Who is the Author?

HTML-Optimizer Pro was developed by Ton Brand from Tonbrand Software in The Netherlands. Since 1995, Tonbrand has offered a variety of freeware and shareware applications.

This program was written in REALbasic*.
