

## What's new in ASTARTE CD-Copy 2.0.3

- Apple PowerPC G3 support

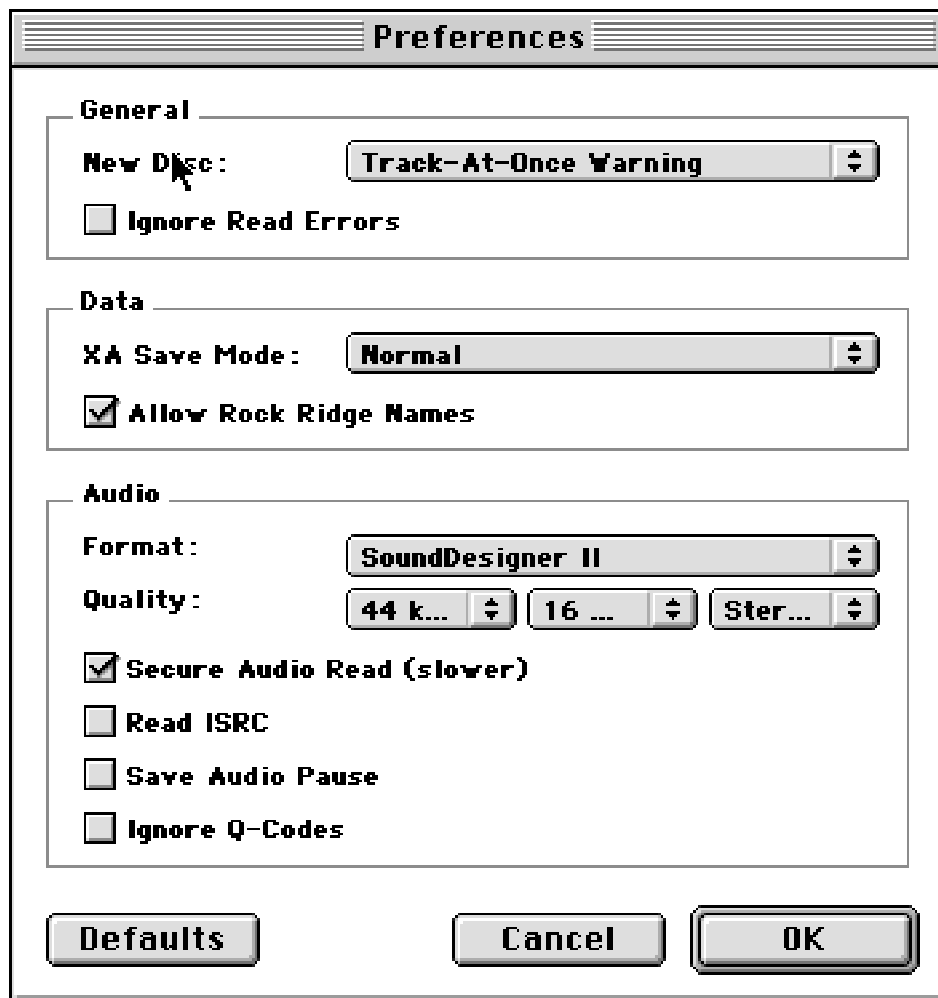

The new bus architecture of Apple's G3 computers is now supported even on Apple PowerBooks.

- Printing

Printing from File menu now works correctly.

- Preferences

In addition to the „Setting Your Preferences“ chapter, page 8 of the manual, now a new checkbox for „Ignore Q-codes“ is available. Q-Codes contain additional information about a sector and can be ignored while copying an audio CD.

## ASTARTE CD-Copy 2.0.2

- CD-Copy on PowerBooks with internal CD-ROM drives: Due to differences between the internal PowerBook CD-ROM drives (3400, 2400 and 1400) and other Apple CD-ROM drives, CD-Copy does not always function properly with these devices. ASTARTE is working hard with Apple to remedy this problem as soon as possible.

*Possible work around:* Deactivate the Apple CD-ROM extension before you work with CD-Copy. To do this open the control panel "Extensions Manager" and deactivate the "Apple CD-ROM" extension, then restart the computer. Or restart the computer while pressing the shift key.

- **System software version:** To run CD-Copy you require system 7.5.1 or higher. CD-Copy has also been tested under System 8.
- **Older Macintosh computers:** Many older Macs and PowerBooks are not supported by the SCSI Manager 4.3.1 and hence are incapable of asynchronous SCSI data transfer. While CD-Copy functions on these machines, performance will suffer considerably.
- **General system requirements:** A Macintosh with at least a 68040 processor or a PowerMac or Compatible machine. System 7.5.1 or higher, 6MB of free RAM, a 14" Monitor (640 x 480) or larger with at least 256 colours, an AT-API (IDE) or SCSI-2 CD-ROM drive.
- **Drivers:** There are various CD-ROM drivers on the market that resist attempts to deactivate them. This may cause problems. Either deactivate these drivers in the Extension Manager or start the computer without extensions. (see "CD-Copy on PowerBooks with internal CD-Drives" above).

- **Technical Support:**

Should problems occur, please consult your manual first.  
If you cannot find a solution please contact us:

ASTARTE GmbH
