

Thayer Birding Software's eField Guide Viewer application can integrate with Cornell Lab of Ornithology's Raven Lite program for displaying spectrograms of bird sounds.

The installation of Raven Lite is optional and not required to run the other features of the eField Guide Viewer application.

The best time to install Raven Lite is right after installing the eField Guide Viewer. If you decide to install Raven Lite at a later time, you will need to go to the eViewer->Preferences menu and select the Spectrogram tab. From there, you can specify the installation location of Raven Lite so the eField Guide Viewer application can properly integrate with Raven Lite.
