QVP: Who needs it?

People who…

- encounter file types not known to or supported by their applications.
- wish to gain efficiency by viewing files rather than launching an application
- encounter native documents on the Internet/Intranet
- receive email with native document attachments

Corporate/Government Organizations that …

- have disparate computing environments
- use email or groupware applications with limited or no embedded viewing technology
- are implementing an intranet
- have significant numbers of mobile users
- transitioning to new operating systems and/or new applications

QuickView Plus®

QVP Features & Benefits

- **View, import and print files in 250 + formats quickly and easily without having the native application.**

- **Saves time, minimizes user frustration, expands access to information, and eliminates the expense of seldom used applications.**

Email Integration

- **Seamlessly integrates into major email applications allowing users to view and print attachments quickly and easily within the email application.**

- **Allows the email recipient uninterrupted focus on the content of the communication.**

Browser Integration

- **View and print non-HTML files from within Netscape Navigator and Microsoft Internet Explorer.**

- **Vehicle for distributing information via a corporate intranet without the hassle, time, and expense required for HTML conversion.**
