

Macintosh Off-Campus Connection

Installing CampusNet Components

1. Double-click the **CampusNet Connection** icon on the diskette or cdrom.

Note: The CampusNet cdrom is freely available at the HelpDesk. The diskette only contains the connection software, not the Internet applications. If you don't have a cdrom drive, you will need to download the applications using your modem.

2. Click **Continue**
3. Select the **Easy Install (installs all components)** option
4. Click the **Install** button
5. You will get a message telling you that your Macintosh will be restarted after installation and asking if that is okay, click **Yes**
6. You will be prompted where to install the software. Select the location and click **Install**
7. The appropriate software for your system will install on your computer. Once it is done, click **Restart**. Your computer will now restart

Checking Your MacPPP Setup

If you are having problems dialing up or would just like to check out your MacPPP settings you can check the following:

1. Open your **ConfigPPP** control panel
2. Click on the **Config...** button
3. Check the **Phone Num** field. It should be **5749600**.
4. Click on the **Authentication...** button.
5. In the **Auth ID** field, make sure you have your CampusNet id entered there (it should be the same as your email name).
6. In the **Password** field enter your CampusNet password given to you by Telecom.
7. Click **OK**.
8. Click **Done**.

Configure MacTCP

1. Open the **Control Panels** folder.
2. Double click on the **MacTCP** icon.
3. Click on the **PPP** icon.
4. Click on the **More...** button.
5. Enter **doc.jmu.edu** in the **Domain** field.
6. Enter **134.126.10.11** in the **IP Address** field.
7. Click on the **Default** button to the right of the IP Address field.
8. Click on the **OK** button
9. Close the **MacTCP** control panels window.

*****note! You will only have *either***

MacTCP OR TCP/IP

--not both!

Configure TCP/IP

1. Open the **Control Panels** folder.
2. Double click on the **TCP/IP** icon.
3. Click on the **Connect via:** field and select **MacPPP**.
4. Configure using **DHCP SERVER**
5. Enter **134.126.10.11** in the **Name Server Addr:** field.
6. Enter **doc.jmu.edu** in the **Search domains:** field.
7. Close the TCP/IP control panels windows.
8. Click on the **Save** button

Note: If you have a cdrom drive, the CampusNet Cd is freely available at the Helpdesk and includes all the supported Internet Applications. If you use the cd, you can skip the rest of these steps.

Getting Netscape

Now that you have all the necessary files installed for your computer to connect to the Internet, you will probably want to get a copy of Netscape. To get Netscape, do the following:

1. Double-click the **Fetch** icon located on the Desktop.
2. At the **New Connection...** window, click **OK**. (A MacPPP status window will appear in your screen. This screen will let you know the status of the PPP connection attempt.)
3. When prompted, enter your CampusNet userID and password and click **OK***
4. Double click on the **Netscape.sea.hqx** file. When prompted, decide where to store the file (**Netscape.sea**) and click on the **Save** button
5. When the **Netscape.sea** file is done downloading (time will vary depending on your modem speed), quit Fetch
6. Double-click on the **Netscape.sea** file and click the **Continue** button.
7. Decide where to unstuff the file and click **Save**. The file will be unstuffed. Once it is done, click on the **Quit** button
8. Open the **Netscape Install** folder and install Netscape (read the **Netscape Install Readme** file if you need help installing Netscape)

* If you do not wish to enter your userID and password each time you connect to CampusNet, do the following:

1. Open the **Config PPP** control panel (look under your **Apple Menu, Control Panels**)
2. Click **Config...** button
3. Click the **Authentication...** button
4. In the **Auth. ID:** field enter your CampusNet account userID
5. In the **Password:** field enter your CampusNet account password
6. Click **OK**
7. Click **Done**

Disconnecting

When you quit Internet applications, your Internet connection does not get disconnected automatically. If you would like to terminate your Internet connection you can either:

- Restart or Shut Down the computer (not very graceful)
- Go to the **ConfigPPP** control, and click on the **Soft Close** button

Now What?

Once you have Netscape installed, you can use it to connect to <http://www.jmu.edu/campusnet/software> and download other applications such as Telnet, Newswatcher, Simeon, etc.
