

Mac Software Installer Instructions

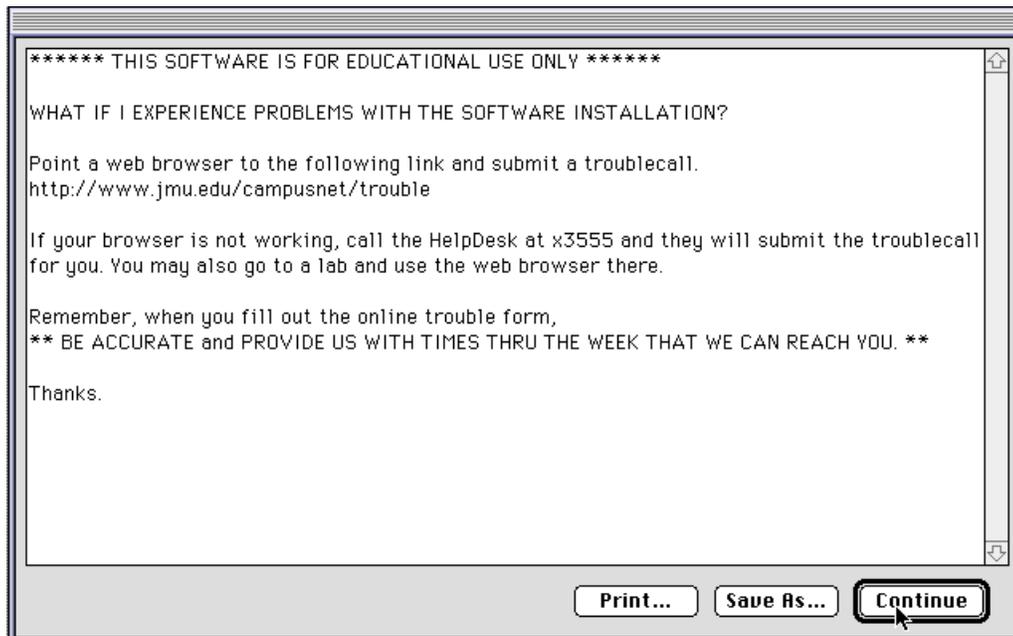

Please read this document through before starting the install process.

1. Close all other open programs before clicking the

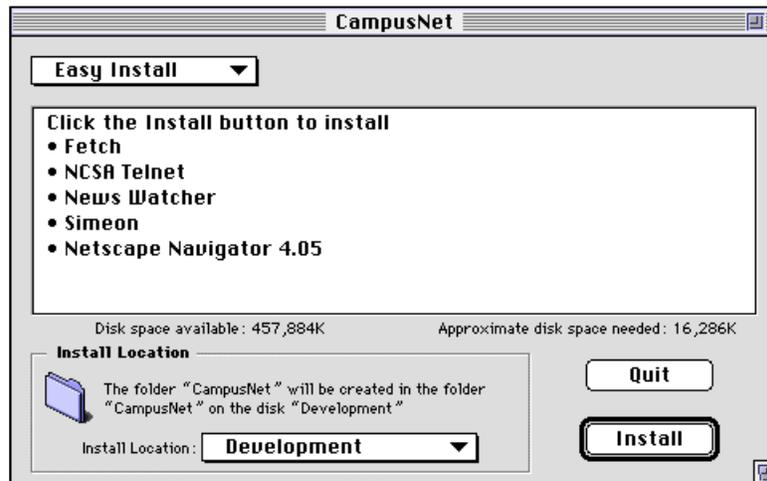

to start.

2. Read the license agreement and click the **ACCEPT** button.

3. Please read and click the **CONTINUE** button.

4. By default, the Easy Install option is selected to install all the applications to your startup disk. In this example, everything will be installed to the Development disk. To start the process, click the **INSTALL** button. If you don't want to install everything, go to page 4 for Custom Install instructions.

5. At this point, you are ready to do the default install.

The software includes:

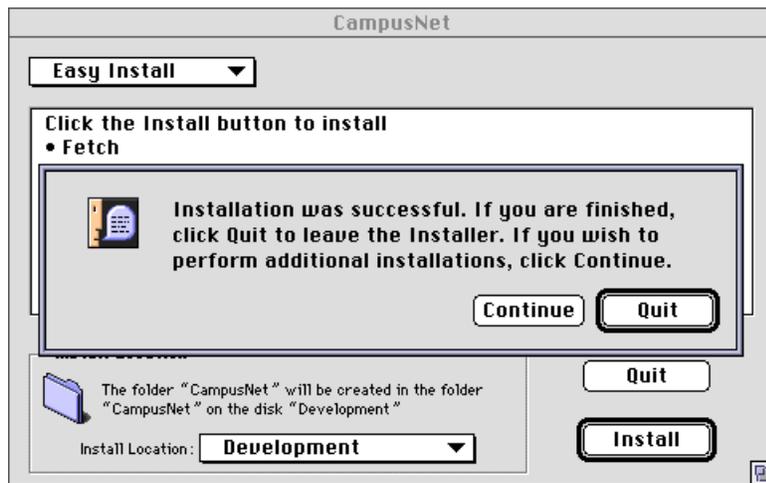

Internet Application	Purpose
Netscape 4.0.5	Surf the World Wide Web
Simeon 4.1.1 PPC	Read and send Email
News Watcher	Scan Newsgroups from around the world
NCSA Telnet 2.6	Connect to your UNIX and VMS accounts; such as Falcon and Raven
Fetch 3.0.1	Download files from the Internet in batch mode

6. If you wish to install the software to a different disk, click the **SWITCH DISK** button or press the down arrow to select from the list of your disks

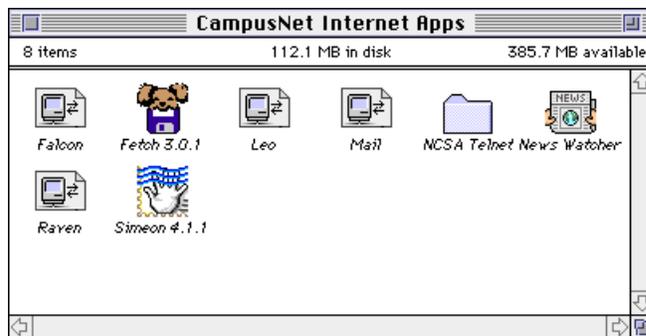

When you click the **INSTALL** button the software will display the following progress meter.

7. Once the installation is complete, the following screen will display. Click the **QUIT** button to close the installer.

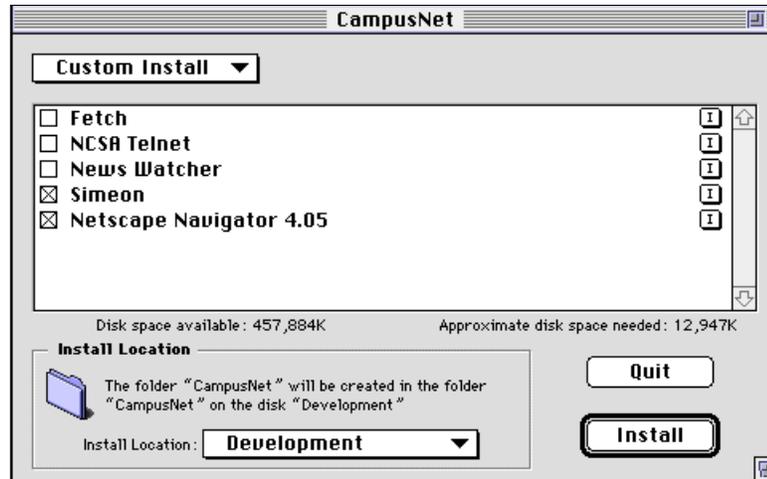

You will now have a folder labeled **“CampusNet Internet Apps”** on your desktop.

You must configure Netscape and the News Watcher before using them.
Go to page 5 to setup Netscape .
Go to page 8 to setup the News Watcher .

8. If you don't wish to install everything, click the **Easy Install** button and select **Custom Install**. You will see the following screen that allows you to select which software packages you wish to install.

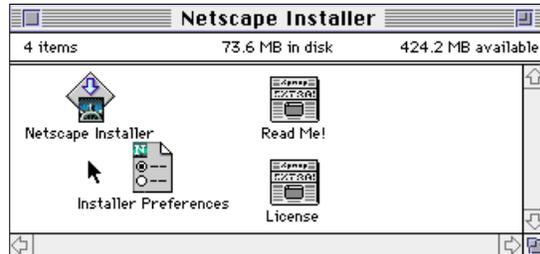

9. By clicking on the box to the left of a package, you may select or deselect the software. An X in a box means that the package will be installed. In this example, the user has selected only Netscape and Simeon to install.

Return to page 3 to finish the Custom Install.

Configuring Netscape 4.0.5

The following folder will be open on your desktop:

The CampusNet installer does not install a working copy of Netscape.

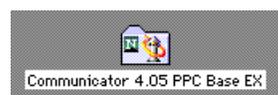

1. You must double click on the **Netscape Installer** icon in the above folder
2. Answer all the prompts and finally click the **Install** button.
The following screen should appear:

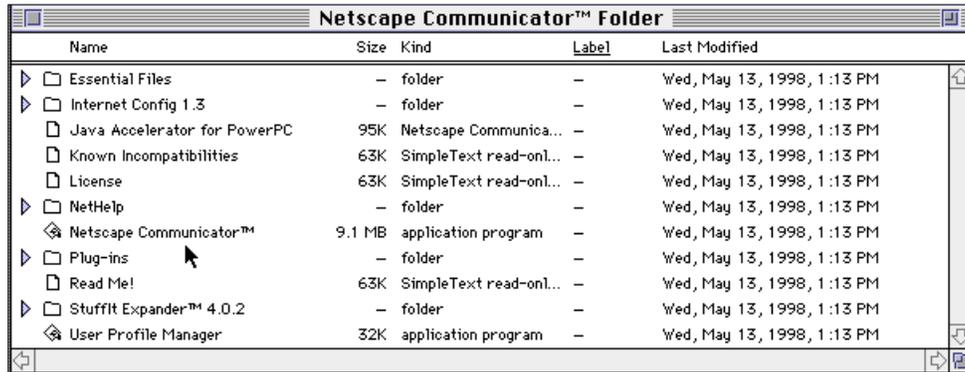

3. Once the installation is complete, the following screen will display. Click the **Restart** button to refresh your computer.

4. You will see the following folder on the desktop: Throw it in the trash.

5. The **Netscape Communicator Folder** will be open on the desktop.

6. Double click on the **Netscape Communicator** program. You will be prompted to set up a profile. This means that each person using your machine can have a separate profile which allows you to have custom bookmarks and settings. To add additional user profiles, double click on the **User Profile Manager**.

You will be prompted with the following screen:

7. Click **Next** to continue.

8. Fill in your **Full Name** and **JMU email address**.

If you are not sure of your email address, contact the Help Desk at x3555.

The screenshot shows a dialog box titled "New Profile Setup" with a sub-header "Information About You". The text inside reads: "To begin creating your new profile, enter the name and email address for the person whose profile is being created. This information will be saved with the preferences of your new profile." Below this, there are two input fields. The first is labeled "Your Name (e.g. John Smith):" and contains the text "First M. Last". The second is labeled "Email address (e.g. jsmith@company.com):" and contains the text "JMU Email account@jmu.edu". At the bottom of the dialog, there are three buttons: "Quit", "< Back", and "Next >".

Click **Next** to continue.

The screenshot shows a dialog box titled "New Profile Setup" with a sub-header "Your Profile Name". The text inside reads: "Use the name provided for your profile or enter a different one. If you create several profiles, you will be able to tell them apart by their names." Below this, there is a single input field containing the text "First M. Last". At the bottom of the dialog, there are three buttons: "Quit", "< Back", and "Next >".

Click **Next** to continue.

Netscape will startup and show the CampusNet homepage. Check out the JMU bookmarks already set for you.

Configuring the News Watcher

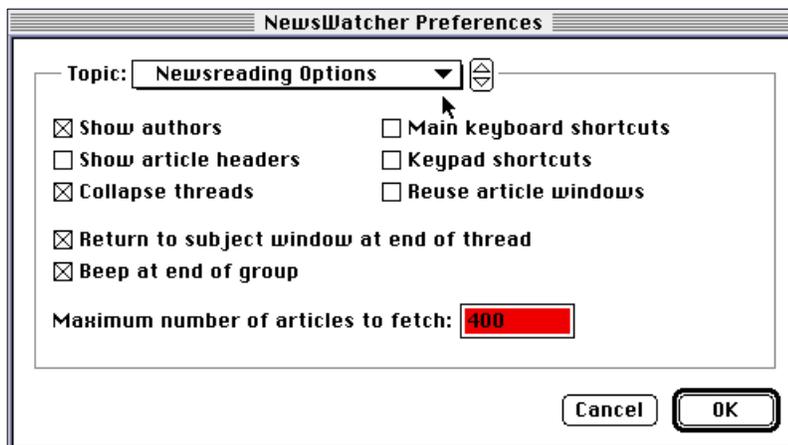

1. Double click the News Watcher icon.

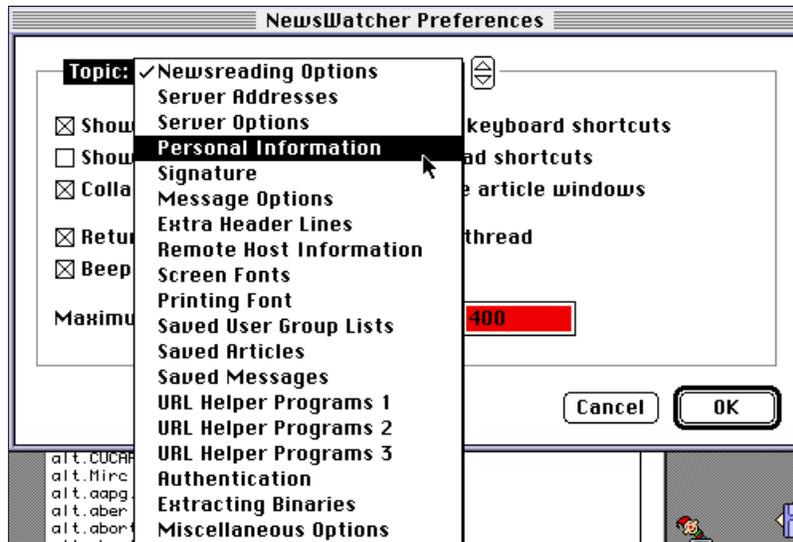

2. Click on the menu item: **File** as shown below.
3. Highlight and choose **Preferences...**

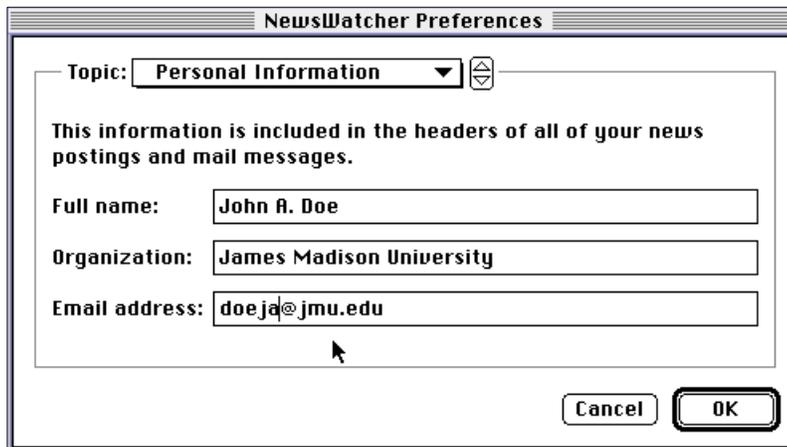

The following screen will display:

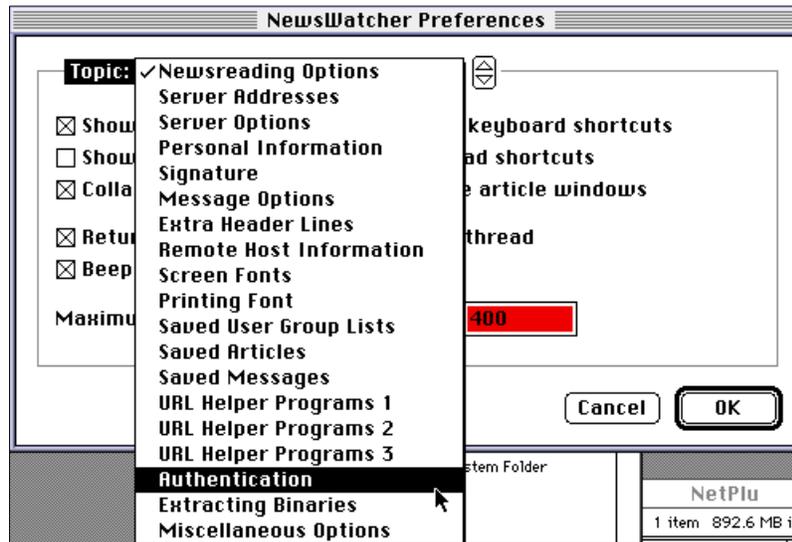

4. Click on the **Topic** button as shown below and select **Personal Information**.

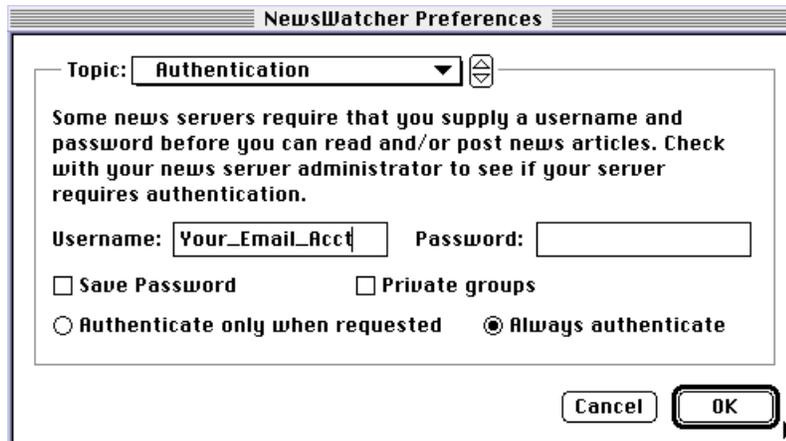

5. Type in your Full Name and complete JMU email address.

6. Click on the **Topic** button and select **Authentication**.

7. Type in your JMU email account name without the *@jmu.edu* portion.
8. Click on the circle next to the phrase “**Always authenticate**” as shown below.
9. Click on the **OK** button to finish.

Every time you start the News Watcher, it will ask you for your Email password.

You will receive the message below if you did not configure the News Watcher with your correct email account information.
