Preface About These Developer Notes xi

Supplemental reference documents xii

Terminology: Sleep State, Idling State, and the Operating State xii

1 Introduction 1-1

1.1 Features 1-2

1.2 Optional additions 1-7

1.3 Internal expansion interfaces 1-7

1.4 Peripherals 1-8

2 Software Developer Guidelines 2-1

3 Firmware 3-1

3.1 Overview 3-3

Terminology 3-3

3.2 Address map 3-3

3.3 Changes to ROM 3-6

Power manager processor 3-6

Apple Desktop Bus 3-6

Real-time clock (RTC) and Parameter RAM 3-7

Serial Driver 3-7

FDHD, the high-density floppy disk drive 3-7

Data storage 3-8

GCR format 3-9

MFM format 3-9

The disk media 3-10

The File System 3-11

- High Density Floppy Disk Driver 3-12
 - Kill I/O (csCode=1) 3-12
 - Verify Disk (csCode=5) 3-12
 - Format Disk (csCode=6) 3-12
 - Eject Disk (csCode=7) 3-13
 - Set Tag Buffer (csCode=8) 3-13
 - Track Cache Control (csCode=9) 3-14
 - Return Physical Drive Icon (csCode=21) 3-15
 - Return Media Icon (csCode=22) 3-15
 - Return Drive Info (csCode=23) 3-16
- Status calls 3-17
 - Return Format List (csCode=6) 3-17
 - Drive Status (csCode=8) 3-19
 - MFM Status (csCode=10) 3-20
- A sample program 3-21
 - FDHD Driver Demo resources 3-33
- Sound Manager 3-35
- Modem 3-35
- Sleep State and Operating State 3-35
- RAM and ROM Expansion 3-35
- Diagnostics—The “sad Macintosh” icon 3-36
 - Major error codes 3-37
 - Minor error codes—Power manager processor failures (Macintosh Portable only) 3-38
 - Diagnostic Code Summary 3-39
 - Test Codes 3-39
 - Power manager communication error codes 3-39
 - CPU exception codes (as used by the startup tests) 3-40
- Script Manager 3-40
- Notification Manager 3-40

4 System Software 4-1

4.1 Overview 4-2

Terminology 4-2

System tools software conversion 4-2

4.2 The Macintosh Portable control panel cdev resource 4-3

4.3 The Macintosh Portable battery desk accessory 4-4

4.4 Macintosh Portable battery monitor 4-5

5 Hardware 5-1

- 5.1 The Macintosh Portable Specifications 5-3
- 5.2 Comparison of the Macintosh Portable and the Macintosh SE 5-6
 - Improvements 5-6
 - Variations 5-6
- 5.3 Block diagrams of the Macintosh Portable and Macintosh SE 5-8
- 5.3 The central processing unit (CPU) 5-11
- 5.4 Video display interface chip 5-11
 - Flat panel display description 5-13
 - Video signal timing 5-13
 - Contrast control 5-15
- 5.6 Permanent RAM array 5-17
- 5.7 Permanent ROM array 5-17
- 5.8 Memory Expansion 5-18
 - Internal RAM Expansion 5-19
 - Internal ROM Expansion 5-21
 - ROM expansion jumper on the main logic board 5-23
- 5.9 Coarse Address Decode and GLU 5-24
- 5.10 Fine Address Decode and GLU 5-24
- 5.11 VIA interface 5-24
- 5.12 SCSI Interface 5-25
- 5.13 SWIM floppy disk interface 5-28
- 5.14 SCC Interface 5-31
- 5.15 Apple Desktop Bus (ADB) 5-34
 - The keyboard processor 5-35
 - Low-Power keyboard 5-35
 - Low-power trackball 5-37
- 5.16 Sound interface 5-38
- 5.17 Macintosh Portable expansion bus interface 5-39
- 5.18 The Macintosh Portable I/O port connectors 5-43
 - Video connector 5-44
 - External disk drive connector 5-45
 - External SCSI connector 5-47
 - RJ-11 telephone receptacle 5-49
 - Apple Desktop Bus (ADB) connector 5-49
 - Serial ports (modem/printer) 5-51
 - Stereo phone jack 5-52

DC power input for the battery recharger 5-53
5.19 Battery recharger 5-53

6 The Power Manager 6-1

6.1 Introduction 6-2

6.2 Power manager states—idling, sleeping, and waking 6-2

BatteryMonitor Code on the 68000 6-4

Idle/sleep code function 6-4

Criterion for idle 6-5

Criterion for sleep state 6-5

6.3 Power management hints (hardware) 6-6

Microprocessor 6-6

Permanent main memory 6-7

ROM memory 6-7

Floppy disk interface 6-8

SCC Interface 6-8

Video Display Panel Interface 6-9

6.4 Operating system interface (ROM calls) 6-10

Calling Sleep 6-10

Sleep request 6-10

Sleep demand 6-10

The Sleep Queue 6-11

Installing a record 6-12

Removing a record 6-12

Sleep Queue calls 6-13

Sleep Request 6-13

Sleep Demand 6-14

Sleep Wake Up 6-14

Network Services 6-14

7 Expansion Card Design Guides 7-1

7.1 Main logic board with expansion connectors 7-2

7.2 Expansion card design guides 7-3

8 Options 8-1

8.1 The modem card 8-2

Summary of modem card features 8-2

Hardware interface 8-3

Analog output 8-7

Power supply and dissipation 8-7

Power control interface 8-8

- Ring detect signal 8-10
- Telephone network interface (Data Access Arrangement) 8-10
- Standards information for reference 8-11
 - Compatibility and modulation 8-11
 - Transmit carrier frequencies 8-11
 - Guard tone frequencies and transmit levels (CCITT only) 8-11
 - Answer tone frequency 8-11
 - Received signal frequency tolerance 8-11
- Command Definitions 8-12
- 8.2 Low-power mouse 8-22
 - Electrical requirements 8-22
 - Active mode 8-22
 - Idle mode 8-22
- 8.3 RAM expansion card 8-23
- 8.4 ROM expansion card 8-23
- 8.5 External video adapter (Macintosh II/NTSC/PAL-European) 8-23
- 8.6 Low power hard drive 8-24
 - Power requirements 8-24
 - Drive interface signals 8-25

Figures and tables
