<u>Hey! What's this?!</u>

*sample**: PSHdlDemo***
*Language**: MPW Pascal 3.2***

This sample demonstrates how to use the PostScriptHandle PicComment to send PostScript to PostScript printers.

This example is only useful for PostScript printers. A sample PostScript file "PS Text" is included. Just open it from the application and click "OK" in the print dialogs.

(Also see the Tech Note "Picture Comments-- The Real Deal.")
