# Table of Contents

## Welcome to Rhapsody 7

### A Simple Application 18

- Creating the Currency Converter Project 22
- Creating the Currency Converter Interface 24
  - Customizing the Application's Window 24
  - Fields and Buttons 28
  - Some Finishing Touches 32
- Defining the Classes of Currency Converter 38
  - Connecting ConverterController to the Interface 44
- Building the Currency Converter Project 54
- Run Currency Converter 57

### A Forms-Based Application 60

- Creating the Travel Advisor Interface 64
  - Getting Started 64
  - Getting the Table View to Work 97

### A Multi-Document Application 118

- Setting Up the To Do Project 122
- Creating the Model Class (ToDoItem) 123
  - Setting Up the Programmatic Interface 123
- Extending an Application Kit Class: An Example 131
- The Basics of a Multi-Document Application 142
- Managing Documents Through Delegation 153
- Managing ToDo's Data and Coordinating its Display 162

### Extending the To Do Application 170

- Overriding Behavior of an Application Kit Class: An Example 174
- Creating and Managing an Inspector (ToDoInspector) 176
- Overriding and Adding Behavior to a Class: An Example 194
- Setting Up Timers 200
- Build, Run, and Extend the Application 203
  - Optional Exercises 203

## Appendices

### A Object-Oriented Programming 206

- Encapsulation 209
- Messages 210
- An Object-Oriented Program 211
- Polymorphism and Dynamic Binding 212
- Classes 214
  - Object Creation 214
  - Inheritance 215
  - Defining a Class 218
  - OPENSTEP Frameworks 219

### B Programming Tools and Resources 222

- Other Development Applications 224
- Other Installed Frameworks 224
- Useful Command-Line Tools 225
- Other Programming Resources 226
