## Overview

This Application Note includes two Ami Pro version 3.0 text converters that convert Ami Pro 3.0 files to and from Microsoft Word version 6.0 for Windows, Microsoft Word version 6.0 for Windows NT, or Microsoft Word version 7.0 for Windows 95. *Ami\_pro.cnv* is for use with Word for Windows, and *Ami332.cnv* is for use with Word for Windows NT and Word for Windows 95.

Also included is *Amilimit.doc*, a Word 6.0 document that contains a table of conversion-limitation information about the Ami Pro converters. The table lists only the features that are not converted, that are not supported in one product or the other, or that require comment.

## Installation and Conversion

### Word Version 6.0 for Windows

To use the converter with Word for Windows, first copy the converter file to your Word program folder (usually, C:\Winword), quit and restart Word, and then open an Ami Pro file.

### To copy *Ami\_pro.cnv* to your Word for Windows program folder

1. If you received a disk with this Application Note, insert the disk in the appropriate floppy disk drive.

If you downloaded this Application Note from an online service, skip to step 2. This procedure assumes that you have already downloaded and extracted the compressed file.

2. From the Main group in Windows Program Manager, choose the MS-DOS Prompt icon. When the MS-DOS prompt appears, type the following and press ENTER

```
copy source:\ami_pro.cnv WinWord
```

where *source* is either the letter of your floppy disk drive or the path to the folder containing the file you downloaded and extracted from online services, and *WinWord* is the path to your Word for Windows program folder (usually, C:\Winword). For example, if you are installing from a floppy disk that you inserted in drive A, and C:\Winword is the path to your Word for Windows program folder, type the following:

```
copy a:\ami_pro.cnv c:\winword
```

Or, for example, if you downloaded Gc1064.exe from online services to C:\Download and C:\Ww

is the path to your Word for Windows program folder, type the following:

```
copy c:\download\ami_pro.cnv c:
\ww
```
