1.8 88.guide/Economy (Georgia)

Economy (Georgia)

=====

Overview:

Among the former Soviet republics, Georgia has been noted for its Black Sea
 tourist industry, its large output of citrus fruits and tea, and an
 industrial sector that accounted, however, for less than 2% of the USSR's
 output. Another salient characteristic of the economy has been a ←
 flourishing
 private sector (compared with the other republics). About 25% of the labor

force is employed in agriculture. Mineral resources consist of manganese ←
and
copper, and, to a lesser extent, molybdenum, arsenic, tungsten, and mercury ←

Except for very small quantities of domestic oil, gas, and coal, fuel must be imported from neighboring republics. Oil and its products have been delivered by pipeline from Azerbaijan to the port of Batumi for export and local refining. Gas has been supplied in pipelines from Krasnodar and Stavropol'. The dismantling of central economic controls has been delayed ←
by

political factionalism, marked by bitter armed struggles. In early 1993 the Georgian economy was operating at well less than half capacity due to disruptions in fuel supplies and vital transportation links as a result of conflicts in Abkhazia and South Ossetia, antigovernment activity in Western Georgia, and Azerbaijani pressure against Georgian assistance for Armenia. To restore economic viability, Georgia must establish domestic peace and must maintain economic ties to the other former Soviet republics while developing new links to the West.
