## 1.7 165.guide/Economy (Morocco)

### Economy (Morocco)

=====

#### Overview:

The economy had recovered moderately in 1990 because of: the resolution of  
 a  
 trade dispute with India over phosphoric acid sales, a rebound in textile  
 sales to the EC, lower prices for food imports, a sharp increase in worker  
 remittances, increased Arab donor aid, and generous debt rescheduling  
 agreements. Economic performance in 1991 was mixed. A record harvest helped  
 real GDP advance by 4.2%. Inflation accelerated slightly as easier  
 financial  
 policies triggered rapid credit and monetary growth. Despite recovery of  
 domestic demand, import volume growth slowed while export volume was  
 adversely affected by phosphate marketing difficulties. In January 1992,  
 Morocco reached a new 12-month standby arrangement for \$129 million with  
 the  
 IMF. In February 1992, the Paris Club rescheduled \$1.4 billion of Morocco's  
 commercial debt. This is thought to be Morocco's last rescheduling. By 1993  
 the Moroccan authorities hope to be in a position to meet all debt service  
 obligations without additional rescheduling. Servicing this large debt,  
 high  
 unemployment, and Morocco's vulnerability to external economic forces  
 remain  
 severe long-term problems. In 1992 Morocco embarked on a program to  
 privatize 112 state-owned companies. A severe winter drought in 1991/92 cut  
 back agricultural output in 1992.
