ARArchive

1.1 ARArchive.guide V1.0 by Robert Reiswig ©1995

Short: Frontend for all AR's (Guide & LHA & LZX)
Author: rcr@netcom.com (Robert C. Reiswig)
Uploader: rcr@netcom.com (Robert C. Reiswig)
Type: docs/mags

ARArchive 1.3.08 (Guide, LHA, LZX)

Many people keep the back issues of Amiga Reports to reference them once in awhile. ARArchive will make keeping track and accessing all of your Amiga Reports much easier.

ARArchive looks for the UNCOMPRESSED or LHA or LZX AR's in AR:
You can set this by running the installer.

*** NEW!!! LZX ***

ARArchive now will unlha or unlzx, and view your Amiga Reports!!!
You must be running AREXX to do this!

The installer will now Build 1 files, if you tell it
that you Store your ARs' in the LHA or LZX format!

It will create 'c:ARA' This is a small AREXX script that
will uncompress .. view .. delete, The selected compressed
Amiga Report.

When you get a new Amiga Report all you need to do is unpack
it to AR: (if you selected .guide files) or just move the new LHA
or LZX file to AR: thats it!

Notes: There is a small problem with lzx .. if you use a
arXXX.lzh with more than just the arxxx.guide file and
the info file... you can only look at 1 Guide.. *IF
you get your AR's off aminet*.. there is no problem!
The "force" overwrite does not seem to work yet...
But will be fixed soon!

If you tell the installer to assign AR: to Ram Disk:

then, in a shell or cli, you need to do: "assign AR: ram:"

QUESTIONS: If you have any questions email me at: rcr@netcom.com
Or catch me on IRC in #amiga as RobR

FIME NAME: ARArchive1308.lha

My Version # _/      \_ Last Version of AR in ARArchive  
                        (Amiga Reports #)
```

THANKS TO:

Jason Compton - for helping me pick the "look" of the frontend,
that was the hardest part. (sure:)

Chuck Croft - Achilles@netcom.com
Helping me find the bug that would not let the Arexx script
load the Uncompressed Guide! (Wheres my F10 key :)

Jerry Reiswig - jerr@netcom.com
Last minute testing!
