Fresh Fish CD 5

=====

AFile 3.12 A datafile manager

AFile is a data file manager, that is a tool which lets you create and manager your files (addresses, video collections, clients, ...) using an Intuition interface. There is no limitation to the number of fields or records. The program offers the standard printing, sorting, and importing/exporting functions. AFile uses AREXX as it's programming language. You can create full input masks with background picture, field positioning, checking of entered data, menus and printing customization.

AmiQWK 2.4 QWKMail format offline message system

QWKMail format offline message system. Allows reading of QWKMail format offline message packets popular with many bulletin board systems (BBSes). Replies can be edited using any text editor and packed for transfer at a later time. AmiQWK has been tested with many QWKMail systems for IBM and Amiga based BBSes.

=====

avmNfax 1.33 Voicemail/fax for voice-capable modems

This is release 1.33 of avmNfax, a voicemail/fax program that supports ZyXEL, LineLink, Dolphin modems, and Rockwell modems. Supras are not supported with

this release.

This version includes its own fax program, printer driver, fax printer, and fax viewer. This fax program can be used with Class 1 and Class 2 fax modems. It can also be used with the voice modems that AVM supports.

It can also work in conjunction with GPFax (or TrapFax) and AXsh (other fax programs or BBSes may be substituted with some ARexx programming) to provide voice, fax, and data, all on one line.

This version is a rewrite of ZVM and it requires MUI 1.4 or greater (it is known to work on MUI 2.0). It supports multiple lines (if you have multiple modems of the same type). You can use avmNfax as a simple answering machine with fax capabilities, or use it to provide multiple mailboxes. It can play different "intro" messages depending on the time of day, day of week, random, or manual selection. You can retrieve your messages remotely, etc. The caller can be told of a forwarding number when he enters a particular mailbox. There are many enhancements since 1.19 was released.

To reduce setup time, I highly recommend that you also get the pre-recorded English voice files. Look for anything that starts with AVMV (like AVMVEngCVSD7200.lha, AVMVEngADPCM2.lha, etc.).

=====

Curses 1.4 Link lib of standard "curses" functions

A link library containing many of the terminal independant standard "curses" functions. Designed primarily for those interested in porting UNIX screen based programs to the Amiga. And examples.

Author: Simon John Raybould
Path: dev/misc/curses210.lha Readme

=====

Date 33.087 A set of routines for calculating dates.

A collection of routines for calculating dates. I have included 52 routines like checking for a leap-year or calculating the easter-sunday! Have a look at this :) Requires ONLY an ANSI-C-Compiler or a C++ Compiler - this means that you could use the C-Source on ALL (i hope so) computer-systems!!!

=====

MUI 2.1 Object oriented graphical user interface

An object oriented system to create and maintain graphical user interfaces. From a programmer's point of view, using MUI saves a lot of time and makes life much easier. Thinking about complicated terms like window resizing or font sensitivity is simply not necessary. On the other hand, users of MUI based applications have the ability to customize nearly every pixel of a program's interface according to their personal taste. Includes developers support package and several demos.

AM 1.0 Maintains users and groups in muFS

AM was written to support the muFS system operator's work by supplying an easy-to-use user interface based on MUI (Magic User Interface) by Stefan Stuntz.

The following gives you a quick overview on AM's facilities:

- * localized (currently English, German, Netherlands, Norwegian, Portuguese, and Swedish catalogs)

- * needs and makes extensive use of MUI 2.0 ('muimaster.library' version 7+)
- * supports the following operations on the muFS system files
 - create new users/groups
 - edit any characteristics of an existing user/group
 - delete users/groups
 - temporarily ban a user from the system
- * automatically creates new \$HOME directories and installs default files there by executing a user supplied script
- * checks \$HOME directories (not functional yet)
- * searches muFS partitions for files with bad owner information and changes them

=====

Fractal 1.3 AGA WB/PubScreen Fractal program

Fractal program with following features:

 Opens on the default public screen (initially the Workbench)

 Usable on any screen with at least 2 "free" pens

 Avoids usage of all pens already "obtained" upon program start
 (i.e., AmigaDOS 3.0 "Protected Pen" compliant)

 Separate user interface and drawing windows

 Resizable drawing window with point-and-click Zoom-In and

centering functions

Adjustable Zoom-Out function

Contents of drawing window can be saved to a standard IFF/ILBM file

Full GadTools Intuition interface

Supports the following types of fractals:

- Mandelbrot
- Julia Set
- Magnetism
- Lambda Exponential
- Lambda Cosine
- Biomorph
- Plasma

All math done in double precision floating point

Separate versions for:

- 68020 without FPU (stock A1200 and A4000/030)
- 68020 with FPU (improved A1200 and A4000/030)
- 68040 (stock A4000/040)

"Smart" iconify function

Help text (displayed on screen banner) for the Zoom In and Center actions

Recommended for use with my PaletteTool and PST programs(!)

Tested OK using the Enforcer
