## fer

### 1.1 CyberGraphX

Sistema per la gestione delle schede video a 16 milioni di colori (24bit), tra cui CyberVision64, PicassoII, Domino, Spectrum, RetinaZ3BLT, Piccolo, PiccoloSD64 e A2410.

Le versioni dei driver sono:

A2410 1.7

Domino 1.24

PicassoII 1.27

Piccolo 1.27

PiccoSD64 1.27

RetinaZ3 1.8

Spectrum 1.27

Mentre le librerie contenute hanno il seguente numero di versione:

cyberintuition.library 40.30

cyberlayers.library 40.8

cybergraphics.library 40.65

vilintuisup.library 2.37

gtlayout.library 26.12

L'archivio contenuto nella versione commerciale è il seguente:

Operation successful.

Nel disco sono contenuti i driver per le altre schede, ma non sono stati  
compattati in questo archivio principale.

Una nota nel readme sostiene che presto CyberGraphX supporterà 9 schede  
grafiche per Amiga anzichè le otto attuali, ma non accenna a quale sarà  
quella non ancora supportata.
