

TitleBar.eps ↪

This directory contains five PostScript files that I created for the **Columbus Ohio NeXT Enthusiasts**. Many copies of these were printed out and placed around campus every month to advertise our meetings. Creating these fliers was a good way for me to learn PostScript, and I believe that the overall quality of the fliers improved as I became more proficient in PostScript.

Several programs assisted in creating these files: **Scene & Grab**, **Text Art**, and **Mathematica**. In addition, I used some of the examples from the *PostScript Tutorial and Cookbook* by Adobe and from `/NextDeveloper/Examples/PostScript` for ideas. The files are actually Encapsulated PostScript, but I placed a `.ps` suffix after them to have them appear in **Preview** instead of **Scene** or **Icon**.

You are welcome to modify them and use them for promoting NeXT at your site. Feel free to contact me if you have any comments or suggestions.
