

# MiscKit In Progress

This file contains a list of projects that are currently being worked upon and who is doing the work. If there is a specific feature you'd want to see implemented in conjunction with a particular project, get in touch with the contact and make the suggestion. The appearance of an item here does not guarantee that the item will ever be finished or ever appear in the MiscKit, but increases the likelihood of this happening! The purpose of this list is to help keep people from duplicating work that has already been, or is being, done. Many of these partially completed projects can be found in the Temp directory of this distribution, and, as they become useable, will migrate into the proper areas of the MiscKit distribution. Anything in the Temp directory should be considered untested and unreliable.

- Mail message, news posting, NeXTMail message, and MIME mail message classes. (Bruce McKenzie, Don Yacktman)
- Generic File class and subclasses for things like directories, pipes, and so on.
- Generalized document handling structure<sup>1/4</sup>Mike Ferris (mike@lorax.com) There is an unpublished sub-mailing list for this topic. If it interests you, and you'd like to see

the source we're working with and participate in coming up with a solution to the issues discussed, contact Don\_Yacktman@byu.edu for more information. The traffic will be higher and more focused here than in the general MiscKit developer's list and NeXTMail is allowed, so be aware of this before signing up.

- Merge MOKit with the MiscKit¼Mike Ferris (mike@lorax.com) with assistance from Don\_Yacktman@byu.edu (or is it the other way around? :- )
- Many-but-at-least-one selection matrix¼ Don\_Yacktman@byu.edu
- Generic Preferences management system¼Don\_Yacktman@byu.edu  
Add in other rendering options, etc¼ Vince DeMarco (vince@whatnxt.cuc.ab.ca)
- Create a streamlined, "barebones" String¼ Don\_Yacktman@byu.edu
- Create a String which is optimized for speed¼ Don\_Yacktman@byu.edu
- Document size palette¼ sanguish@digifix.com (Scott Anguish)
- Enhance ClockView, probably adding alarms, docs¼ sanguish@digifix.com (Scott Anguish)
- PDO example app¼ John\_Karabaic@next.com (John Karabaic)
- QualifiedDBModule¼ David Apfelbaum (da0g+@andrew.cmu.edu)
- Formatted Text Field¼ David Apfelbaum (da0g+@andrew.cmu.edu)
- ColorWells for the various Misc\*Color objects, to go on MiscColorWells palette¼Don\_Yacktman@byu.edu
- MiscNTPTime object (subclass of MiscTime)¼ kane@gac.edu
- What are you working on? Let's get it listed in here. E-mail Don\_Yacktman@byu.edu to get a listing.
