This material was submitted by dlehn@ARPA.MIL (David Lehn)Ðbut I haven't had the time to go over it in any sort of detail.   Hopefully the next release will have the better items from this code folded into it.   Here's the Text of the message within which this material was contained:

Use at will, no warranty, satisfaction not guaranteed, no FDA approval.

The time doc really needs work.   Alphbetize for instance.   But it might help you to write one for the current DAYTime incomplete object.

Too bad I haven't had much time to work with it!   I'm providing it in the distribution just for the curious, so that they can see what's up.

Later,
