Features

- The second edition of the popular Nova CDROM for NeXT hardware.
- All applications are ready to run directly from the CDROM
- Applications in categories such as utilities, astronomy, graphics, communication, audioapps, graphic, mail, clocks
- Games/entertainment applications totalling 31.9 MB
- 119 NEXTSTEP ready fonts
- Fonts directory can be directly linked with hard disk to make all fonts on the CDROM available to the user without taking up any disk space.
- 42 modules for the BackSpace screen saver
- 22 NEXTSTEP Palettes for Interface Builder
- More then 52 MB of source code
- 74 sound files
- Contains Pcomm, the unix shell terminal communications program compiled to run on NEXTSTEP and other terminal programs.
- Each directory contains an index to make it easier for a user to locate a file.
- Indexes are fully indexed in Digital Librarian (for 3.2).
- Source code included with many of applications.
- All applications were compiled using NEXTSTEP 3.1 or higher
- All applications were compiled in NeXT (Motorola) only binaries to save disc space.
- All binaries have been "stripped" to save disc space.
