

Nebula

Specs/Features

Specs

Retail price: \$59.95

Date produced: August 1993

Target platform: NEXTSTEP 3.1 or higher for Intel

Megabytes on disc: 491.612 MB

Format:ISO 9660 with Rock Ridge Extensions (unix)

Compression used on disc: none

Author: Eric Tremblay

Features

- The first collection of it's kind for NEXTSTEP Intel
- All applications are ready to run directly from the CDROM
- Applications in categories such as utilities, astronomy, graphics, communication audioapps, graphic, mail, clock
- Games/entertainment applications
- 119 NEXTSTEP ready fonts
- 30 modules for the BackSpace screen saver
- 83 sound files
- More then 160 MB of source code
- 9 NEXTSTEP Palettes for Interface Builder
- All applications were compiled using NEXTSTEP 3.1
- Source code included with most applications
- Contains Pcomm, the unix shell terminal communications program compiled to run on NEXTSTEP for Intel.
- Each directory contains an index and a list of files to make it easier for a user to locate a file.
- Indexes and list of files are fully indexed in Digital Librarian.
- Fonts directory can be directly linked with hard disk to make all fonts on the CDROM available to the user without taking up any disk space.

- All applications were compiled in Intel only binaries to save disc space.
