Q: I just installed NEXTSTEP Release 3 and discovered that the library libcs.a is missing. What happened to it and where can I get it?

A: The libcs library has been removed from Release 3 (and beyond).   The libcs library was written at Carnegie Mellon University and can be obtained, in source form, directly from CMU.   To obtain libcs you need ftp access to the Internet:

```
localhost> ftp cs.cmu.edu
Name (cs.cmu.edu:username): anonymous
331 Guest login ok, send username@node as password.
Password:
ftp> cd sys/libcs
ftp> bin
ftp> get READ_ME
ftp> get libcs.tar.Z
ftp> bye
```

Note: Make sure that you cd to sys/libcs as one commandÐcd fails otherwise.
