

# NILoginPanelTest

by Charles Lloyd

## Overview

This example shows how to bring up a login panel, and do password authentication. The example uses specifically the NetInfoKit classes NILoginPanel and NIDomain.

Note that you need to link with **libni\_s.a** in order to use the NetInfoKit API.

Valid for 3.0, 3.1

## Change History

28/May/93 Wrote README. Modified and tested for 3.1 - Mai
