In the past, I have left this directory out of the MiscKit releases.   Now that development is public, I've decided to allow people to look at this stuff.   Basically as people send me suggestions, toys, etc., I place them here.   As I get the time, I fold them into the kit.   So, basically, this is sort of the ªcoming attractionsº section of things.   Anything you e-mail me will end up in this directory's counterpart on my machine until I've done what I'm going to do with it.

Anything in this directory is utterly, completely, ªuse at your own riskº software and most likely untested or very nearly so.   Notes about origins and future plans for this code may be found in the top-level Authors.rtf file.

Just so you know¼

Later,
