CleanCenter v1.33.11

==

Have you ever wondered how much of your disk space is used by temporary files, files that were created during installation of programs, or those that are no longer needed for any application? It may not be much, but it is still worth considering! CleanCenter will find and delete such files and clear up lots of space on your hard drive.

1. Introduction

CleanCenter is a user-friendly application developed to free up disk space by deleting junk files that are no longer used by any software on your system. Even the least experienced user can easily remove junk files with this tool. Just select the drives to be cleaned, then scan the system for more than 50 types of junk files and then click the 'Clean Now' button. As easy as that! While your system is being scanned for useless data, you can see how much space you will gain.

2. Key Features

- Supports 50+ types of junk files
- Many other options to clean Windows temp folders
- Supports Clean Windows Registry
- Check for the latest version when you are online
- Easy to Install/Uninstall
- Simple and easy to use interface

3. Registration

Registration Fee: $29.95USD
