### **Upgrade Notice**

Please note that version 1.5 of TimeCore Solo upgrades the DAT file which makes it incompatible with earlier versions.

#### **1. SYSTEM REQUIREMENTS**

- Windows 95, 98, ME, NT, 2000, or XP.
- Minimum Resolution : 800 x 600 using standard font size.
- 5MB of disk space.
- **Windows 95 Only** - TimeCore requires the latest versions of the Windows common controls which are usually installed by having the latest version of Internet Explorer. New installations of Windows 95 have older versions of these controls which are missing in TimeCore. To resolve, please install the latest version of Internet Explorer or download 50COMUPD.EXE (controls only) from Microsoft's website.

#### **2. WHAT'S NEW**

See Help documentation for full details on what has been added, updated and fixed in this version.
