Installing PictureProject: *Digital SLR Cameras (Windows)* 1/5

Starting the Installer

1 Start the computer and insert the PictureProject installer CD in a CD-ROM drive. A language-selection dialog will be displayed.

2 Select a language and click **Next**. The "Install Center" window will be displayed.

Easy Install: Install the minimum software needed to run PictureProject.

Custom Install: Install selected software.

Capture NX Free Trial: Download the trial version of Capture NX (Internet connection required).

Customer Support: View the ReadMe file or visit Nikon technical support websites (Internet connection required).

✏ **If the Language Selection Dialog Is Not Displayed**
To display the language-selection dialog, select **My Computer** from the **Start** menu (Windows XP Home Edition/ Windows XP Professional) or double-click the **My Computer** icon on the desktop (Windows 2000 Professional) and double-click the CD-ROM (PictureProject) icon in the My Computer window.

# Installing PictureProject: *Digital SLR Cameras (Windows)* 2/5

Easy Install

Clicking **Easy Install** installs the following software:

• Drivers for D1-series cameras
• Apple QuickTime
• PictureProject
• Camera Control Pro Updater
• PictureProject In Touch
• Microsoft DirectX 9

**1** Click **Easy Install**.

2 The dialog shown at right will be displayed. Follow the on-screen instructions to install drivers for D1-series cameras.
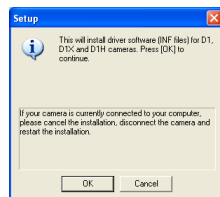

3 Click **Yes** to install QuickTime (some time may be required to complete installation on some systems).

4 The PictureProject setup pro-gram will now start. After reading the license agree-ment, click **Yes** to accept the agreement and proceed with installation.
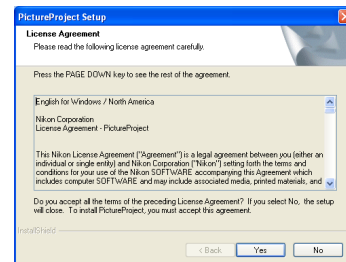

5 The destination folder for PictureProject will be dis-played under "Destination Folder." Click **Next** to install PictureProject to this folder, or click **Browse** to select an-other destination.
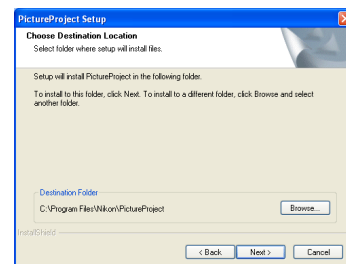

**6** Click **Yes** to create the desti-nation folder.
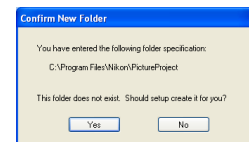

Installing PictureProject: *Digital SLR Cameras (Windows)* 3/5

7 Click **Yes** to create a shortcut to PictureProject on the desktop, **No** to proceed without creating a desktop shortcut.
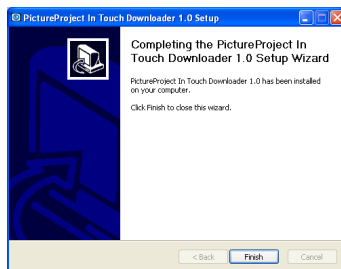

8 Click **Finish** to exit the PictureProject installer.
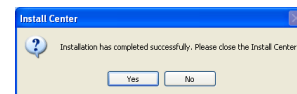

9 The PictureProject In Touch Updater installer will start. Click **Next** and follow the on-screen instructions to complete installation.

**10** Click **Finish** to exit the PictureProject In Touch Updater installer.

11 Click **Yes** to close the "Install Center" window. If a dialog is displayed directing you to restart the computer, follow the on-screen instructions.

**12** Remove the installer CD from the CD-ROM drive.

✎ **Microsoft DirectX 9**
The Pictmotion option requires DirectX 9 or later. If an earlier version is installed, the dialog shown at right will be displayed. Follow the on-screen instructions to install DirectX 9.
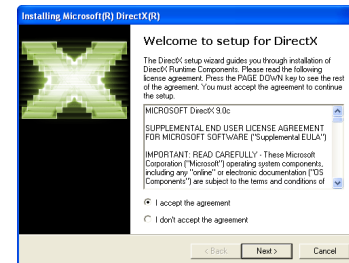

✎ **Import Assistant**
The PictureProject Import Assistant will be displayed when installation is complete. The Import Assistant is used to catalog pictures already on the computer for display in PictureProject. For more information, see "**Cataloging Pictures**."
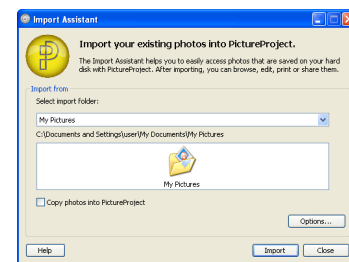

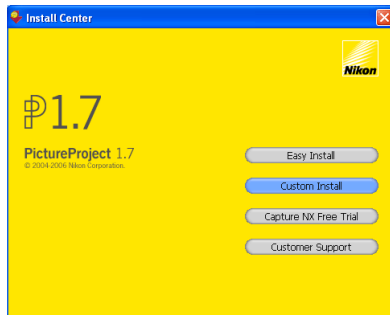

# Installing PictureProject: *Digital SLR Cameras (Windows)* 4/5

Custom Install
