## How to Play the Demo

After the *MechWarrior 3* demo loads, you will see the Main Menu where you have the following options:

Instant Action	Play an Instant Action mission
Options	Configure your computer and set game options
Quit	Return to the Windows desktop

We recommend first choosing "Options" to configure the game. Select the Graphics & Audio button to verify your graphics settings. Check the setting for "Video Device." The demo should automatically select the optimal graphics card, but you can change it if you need to. "Software Render" means that no 3-D graphics accelerator is being used, and "Primary Display Driver" means that your Direct3D graphics accelerator is being used. If you experience any problems, please read the section below called "Troubleshooting Information."

Next select Instant Action to play the game! This Instant Action mission consists of you vs. multiple waves of enemies. As you destroy each wave, the next one is tougher and more difficult to defeat.

After you click Instant Action, enter your name by clicking Pilot Entry. Type in your name and then hit the Enter key. Then click on your name under Pilots to select yourself. Click the Continue button.

At the next screen, you can choose your 'Mech and allies. Click the Accept button to start the Instant Action mission or Abort to return to the previous screen. You can also click the 'Mech Lab button to choose your 'Mech and also customize its equipment and armament.

Please look at Game Commands below for information on what keys to press, etc.

To quit the Instant Action mission, press Esc and then select Quit to return to the Main Menu. When your 'Mech is destroyed, the mission is over and the Instant Action screen will show you the last wave you reached.

## Troubleshooting Information

If you have any problems with the *MechWarrior 3* demo, please make sure that the drivers for your video cards are up to date. We suggest checking the Web site of the video card manufacturers first for their latest driver versions. If those drivers do not work, we suggest trying the reference drivers for your graphics card. (For example, if you have a 3Dfx Voodoo card, try the reference drivers from [www.3dfx.com](http://www.3dfx.com). If you have an Nvidia Riva TNT card, try the reference drivers from [www.nvidia.com](http://www.nvidia.com).)

Q: The demo insists on running in Software Render mode even though I have a 3-D graphics accelerator.

A: You probably need to update the drivers for your video cards.

Q: I have a Voodoo 1, STB Velocity or similar older graphics accelerator, and the demo has problems with textures.

A: This problem will be fixed for the release version of *MechWarrior 3*.

Q: I have a Matrox Millennium II video card, and the demo will not run correctly.

A: Unfortunately, your Matrox Millennium II video card is not 100% compatible with Direct3D. Therefore, you need to change the "Video Device" in the Graphics setup from "Primary Display Driver" to "Software Render."
